Hauraki District Community Outcomes

HOW DID THE HAURAKI COMMUNITY IDENTIFY ITS OUTCOMES?

During the period of October 2004 through to June 2005, Council undertook an intense consultation process with the community. A number of different methods were used to find out what the people of Hauraki wanted to see for the future of the District.

In October and November 2004, an independent survey was undertaken of the residents and ratepayers of the Hauraki District. The survey was carried out for a number of reasons, including seeking the community's view of Council and overall satisfaction with Council services. The survey also asked people what the single most important issue was in the community. A proportionate number of surveys were carried out per ward, including out-of-district ratepayers.

During 2005 Hauraki District Council drew together key parties, led and facilitated the development of a new set of Community Outcomes for the Hauraki District. Invitations were sent to government agencies, community groups, churches, youth groups, clubs and organisations schools, health and social services sector, businesses, the Maori community and a random selection of people living in each ward. Open invitations were also provided to the community as a whole if they wished to participate in the forums.

Fourteen of these forums were held throughout the Hauraki District with over 200 people of all ages participating. An independent facilitator conducted all forums by group discussion covering important issues of health, economic development, tourism, social services, youth, education, environmental, business, sport, recreation and culture, Maori needs and rural lifestyles and values.

Each forum was asked what they wanted to see for the future of the District, both generically and with a focus on their relevant group, whether it be based on locality or based on particular sectors.

Hauraki Primary School students had the opportunity to participate in an art and short story competition, with excellent results. Participants eagerly contributed their individual needs and priorities, pooling together vibrancy, knowledge and enthusiasm all with the goal to make Hauraki a better place to live for themselves and their families.

Further opportunity for comment was made available via the internet and local newspaper.

The consultation process was very successful. Discussions occurred between organisations, groups and individuals during and after the consultation process, and it was encouraging to see projects beginning very shortly after the workshops were held. The process especially highlighted the gaps in some areas of service, while also demonstrating that there were people willing and able to help address problems and look towards solutions.

It is important to acknowledge that although the Community Outcomes in their current form are new, they have underpinned the work that many agencies (including the Council) have already undertaken over many years. For example, the work of the Hauraki Coromandel Development Group, formed in 2001, has been working towards all of the outcomes in the 'vibrant and sustainable businesses and business economies' group of outcomes since it was formed.

Community Outcomes

Hauraki District Community Outcomes

WHAT ARE OUR COMMUNITY OUTCOMES?

Under section 91 of the Local Government Act 2002 all Councils are required to identify Community Outcomes – these outcomes are collective statements of community goals and aspirations – ‘the things that the community thinks are important for its well-being’.

Outcomes are a positive way to stimulate thinking about local needs and priorities, for now and in the future. Outcomes help act as a guide for the setting of priorities for both Council and for other agencies not only individually, but also in partnership.

Council is required to identify Community Outcomes at least once every six years, and then monitor and report on them at least once every three years.

Age 9, Waihi South School
“How I see Waihi in 10 years time?”

What do I want in Waihi?

The Swimming Pool

I want a swimming pool in Waihi that we can swim in all seasons winter, summer, autumn and spring. In the swimming pool I want a hydro slide.

There will be a stand out of the pool that sells chocolate bars.

I want a really humungous deep end only for people who can swim and a little part for babies that has bars around it so they don't get out. There will be a stand on the way in there and will be a person in it and she will say “Can I please have your ticket? It will sell drinks and food too, like hot dogs and other things. The pool will be painted red dots and purple stripes with glass around it. There will be a playground in the water. The playground will have a pretend rocket and a swing set.

Hauraki District Community Outcomes

Hauraki District

SO - WHAT ARE HAURAKI'S COMMUNITY OUTCOMES?

As a result of the community working together to identify what the future of Hauraki should look like, the communities of Hauraki have collectively said that there are clearly common goals that should be aimed for. The Hauraki District Community Outcomes are:

Vibrant and sustainable businesses and business economies in our District -

- We encourage further development of our District CBD's economic viability.
- We support entrepreneurs and leaders to proactively drive growth strategies and community business within our District.
- We encourage planned and developed infrastructural services and facilities to sustain our communities' growth.
- We encourage further development of tourism opportunities and facilities focusing on our heritage and eco-tourism.

Integrated provision of quality health and social services throughout our District -

- Our community seeks the improvement of mechanisms for co-ordination, delivery, communication and education by health and social service providers.
- We support the development of new initiatives that address well-being of those in need and of our community in general.

Maintain and protect the vibrancy of rural communities within our District -

- Our communities support the viability of maintaining our rural lifestyles and values.
- Protecting the viability of our land for primary production.

Cultural values of tangata whenua throughout the District be respected and supported through further development of consultation, participation and partnerships -

- We encourage the development of culturally appropriate programmes and processes.
- We encourage service providers to develop partnerships that assist with capacity building of our tangata whenua to participate in decision-making processes.

Our Hauraki youth be provided with greater opportunities to participate in the decision-making processes pertaining to the development of our communities -

- We support the wider community and organisations to encourage and engage youth to actively participate.
- We need to understand, identify and address specific issues relating to our youth.

Community Outcomes

Hauraki District Community Outcomes

Community Outcomes

We encourage increased opportunities to participate in recreational, sporting and cultural activities -

- Our recreational, cultural and heritage groups work together to identify issues that lead to better efficiencies, access and sustainable solutions.
- We encourage better utilisation of existing infrastructure and resources.
- We support planning for our culture and heritage where initiatives can be actively co-ordinated to ensure sustainability.

Hauraki District residents be given the opportunity to participate in education and training programmes -

- We encourage better communication and co-ordination between education providers.
- We support the need for improvement on the transition between educational levels to allow further training and work opportunities.

Management of our natural and physical environment in a sustainable manner -

- We encourage a balance between economic growth and environmental protection and enhancement.
- We support the development of land use planning controls that allow for economic growth in a sustainable manner.
- We support protecting our significant habitats and ecosystems.

Long term planning to ensure that our future infrastructure requirements meet the growth and development opportunities of our District -

- We want to have our say on our District's future.
- We value the provision of well-managed infrastructural services in our District.

Community Outcomes

Hauraki District Community Outcomes

COMMUNITY OUTCOMES MONITORING

OUTCOME MEASURES AND INDICATORS

Council is required to include measures that demonstrate progress towards the achievement of Community Outcomes in the Hauraki Community Plan 2006-16. An interim set of Community Outcome indicators has been identified and is included below. The Community Outcome identification process provided Council with numerous areas of guidance and advice from the community on how to further the Community Outcomes and this direction was utilised in preparing the 2006-16 Community Outcome measures. Further indicators are needed at a local level. These indicators will be finalised and expanded on over the coming three years, in conjunction with other key stakeholder groups, and those which can most effectively contribute information identifying progress towards the achievement of Community Outcomes. This process will be recorded through the Annual Plans in 2007/08 and 2008/09. Other measures may become apparent throughout the life of the plan and any changes to the measures will also be presented in interim Annual Plans. A full monitoring report has to be produced in 2009.

COLLABORATION TOWARDS OUTCOME ACHIEVEMENT

Council will now consider whether its services are contributing to the achievement of the Community Outcomes. For Council, many services already make progress towards the Outcomes, and throughout the Hauraki Community Plan these contributions are presented. But Community Outcomes cannot be achieved by Council alone. Other organisations are required to be involved for this process to be effective and for the Outcomes to be achieved.

A start has been made to consider ways to progress Outcomes both in organisations everyday roles and through working jointly with other agencies such as Hauraki District Council. The aim of this collaborative process is to bring agencies further together to discuss developing better processes and

projects collaboratively. This process is going to take time and effort to develop over the coming years.

The Hauraki District Council is already actively participating in several processes which will assist in the monitoring of Outcomes. All Councils in the Waikato Region have established a joint project to develop methods of monitoring and reporting on Outcomes at a regional and local level. Councils participated in regional and district level forums covering the whole of Waikato, that allowed the sharing of resources, knowledge and costs in a positive and ongoing working relationship. These regional forums not only acknowledged the identification of Community Outcomes but also how each organisation or group can monitor and report on achieving Community Outcomes in a coordinated manner. Hauraki District is part of this project and supports this initiative. Further information can be found in the section "Waikato Regional Community Outcomes" in Appendix 6 on page 223.

For some of the Outcomes Hauraki District Council will be one of those organisations taking a key leadership role. For others Council will be in a partnership or facilitative role working alongside other agencies. In some partnerships Council will be the lead agency, in others it will be a supportive participant, and there will be many projects that other agencies will undertake without the need for Council to be involved.

FORMAL REPORTING ON PROGRESS

Council is required to report to its community in a three yearly monitoring report on how each of the Community Outcomes has been worked towards by all contributing agencies. This reporting will assist in ensuring that the Hauraki Community Plan remains a relevant document to the community, the Council and other groups involved in the progression of Community Outcomes.

Council will additionally report on Council activities that have contributed or progressed towards the achievement of Community Outcomes annually. The Annual Report must be adopted by 31st October each year and will be made available in early November each year.

Community Outcomes

Hauraki District Community Outcomes

Although Hauraki District Council is required by law to consider how it may make progress with each of the Community Outcomes, no other agencies (even Central Government agencies) are required to do the same. In order to keep advancing, Council will work with other agencies and organisations to encourage cooperation and progress towards what the community has identified as priorities.

Further contribution towards Community Outcomes over the next 10 years, particularly the next three, means that Council may propose in the future some changes to the services it operates, the standard of services offered, or the way the services are delivered. It should be noted though that some services such as Animal Control are required to be delivered by Council, however they might or might not contribute to the identified Community Outcomes.

POTENTIAL BARRIERS TO MONITORING

Gathering quality and current information specifically relating to the Hauraki District and how all agencies could contribute to the achievement of Community Outcomes faces several major barriers:-

- Currently local authorities are those only legislatively accountable to working towards achieving Community Outcomes. Government departments and government agencies are not bound to work with local authorities to further these outcomes. Some government departments are committing to working at a regional level, which is proving difficult for local authorities to be able to accurately report on local outcomes, when monitoring processes and programmes of actions do not align.
- Some agencies such as the Ministry of Social Development and Waikato District Health Board do have a local presence and their willingness to be able to contribute towards outcomes locally is encouraging.
- A large amount of monitoring data is used from the national census. However this census takes place once every five years on a different cycle to the 3-yearly local government reporting requirements. Census information is also not usually available at a detailed level for up to a year following each census;
- It is extremely difficult to obtain information at a District level outside of Census data. Government agencies largely do not have information collected at a local level, although many of them can provide it regionally. Information at the regional level, is not as effective for local authorities to utilise as the data is combined with neighbouring councils of which have differing demographics to Hauraki District, and as a consequence the accurateness of the data specifically for the District becomes generalised;
- The individual boundaries of central government and local government can extend into each others regions;
- Local organisations, especially volunteer ones, either do not collect monitoring data, or if data is collected it may be only informally. It may be necessary in future to develop and put in place specific monitoring systems to monitor Community Outcomes.

Community Outcomes

HOW DO OUTCOMES LINK TO THE WORK OF HAURAKI DISTRICT COUNCIL?

The Community Outcomes have been developed by the community (which includes the Council as well as other organisations and individuals). The Outcomes belong to the community, not solely to Council. The Hauraki District Council has agreed to support the Community Outcomes for the District, however it is not required to adopt them in the same way that it is required to adopt the Hauraki Community Plan, or even to agree with them. Council's key action will be deciding how it will contribute to the outcomes that the community has identified.

Council's role in the outcomes process is to facilitate the process, promote or achieve the Outcomes (as one of the parties able to do so), and monitor progress towards the achievement of Community Outcomes for the Hauraki District. Council's response to each of the Outcomes is going to vary.

A number of the Community Outcomes that have been identified for the Hauraki District do not relate to Council's core functions but do in fact give the Council 'permission' to consider becoming involved in matters that the community sees as having a high importance, to one or more of the social,

Community Outcomes

Hauraki District Community Outcomes

economic, environmental or cultural well-beings. In particular areas where the Council has not directly been involved in the delivery of services include:

- Outcomes relating to the integrated provision of quality health and services throughout our District;
- Hauraki youth being provided with greater opportunity to participate in the decision-making processes relating to the development of our communities;
- Hauraki District residents being given the opportunity to participate in educational and training programmes.

During the next three years Council will be developing policies from strategies and processes that may see it become involved in achieving these Outcomes in either an advocacy, facilitation or service delivery role. The Council believes it has support from the community to at least consider how it may become involved and is likely to seek the support of other groups and organisations in developing any proposals in these areas.

ROLES FOR COUNCIL IN DELIVERING COMMUNITY OUTCOMES

Council can contribute to Community Outcomes in a variety of ways. These roles are defined as:

Role	Explanation
Leader	Council inspires and drives community involvement in the best interests of the District. Council has a dominant but not necessarily determining influence in joint consideration of proposals or actions.
Advocate	Council promotes and encourages progress towards achievement of a goal by other organisations through active liaison.
Partner	Funding and carrying out of an objective to reach a goal is done by Council in formal partnership with other organisations.

Role	Explanation
Implementer	Planning and carrying out an action contributing to the achievement of an outcome is fully Council's responsibility.
Regulator	Council has statutory responsibility and may choose or be required to regulate an activity.
Monitor	Council gathers information on actions and processes and checks and reports on progress against the targets set.

The role of each council activity in contributing to each Community Outcome is stated at the Group of Activities on page 78.

CAN THESE OUTCOMES BE CHANGED?

Yes, if you as a community think they need to be. Your feedback, obtained through consultation, both at a regional and a district level, will form Community Outcomes again in six years time covering the 2012-2022 period. This consultation process must be repeated every six years to ensure that changes in community perspectives and desires are reflected in up to date Outcomes.

HOW OTHER COUNCIL PLANS CONTRIBUTE TO COMMUNITY OUTCOMES

The Council has a number of policies and strategies in place to enable planning for the future. These were developed through public consultation processes prior to the Local Government Act 2002, and have provided direction and information in drafting this Hauraki Community Plan.

The 2004 transitional Hauraki Community Plan contained many of the strategies and directions from these documents. This reflected the previous direction of Council in delivering agreed service levels.

Community Outcomes

Hauraki District Community Outcomes

The 2006 Hauraki Community Plan contains the Community Outcomes developed in conjunction with the community and provides the Council with goals and objectives to be pursued in the future.

From this point, when each Council planning document is reviewed and updated, clear links between the Hauraki Community Plan and these strategic documents will become clearer. In particular, each strategic document will set the methods by which the Council will deliver agreed Community Outcomes.

The following are key plans and strategies that have been drawn together in the Hauraki Community Plan.

HAURAKI DISTRICT PLAN

The Hauraki District Plan sets objectives, policies and rules to provide for the use of the District's natural and physical resources in a sustainable way, as required by the Resource Management Act, 1991.

Council's first District Plan was adopted in September 1997. Council is currently reviewing this plan and aims to adopt a Proposed District Plan in 2007. It will then go through public notification, consultation and Hearings. The new Operative District Plan may therefore not exist before 2008/2009.

The Outcomes identified in the Hauraki Community Plan will be incorporated into the Reviewed District Plan. How this will occur has not yet been discussed, but methods to achieve this will form part of the consultation process during the Review.

ANNUAL REPORT

An Annual Report is produced by 31 October each year and is designed to inform stakeholders of:

- Achievement of financial and performance standards agreed to in the Hauraki Community Plan or Annual Plan;
- Reasons for variations;
- Details on asset purchases or sales.

The Annual Report is also required to report on progress towards achievement of Community Outcomes as detailed in the Hauraki Community Plan and any identified effects on the social, economic, environmental or cultural well-being of the community.

The Annual Report is audited each year prior to publication.

ASSET MANAGEMENT PLANS

The community expects Council assets to be managed in a way that balances, and makes the most of levels of service and costs. Council has developed basic Asset Management Plans for all infrastructural and community assets (e.g. Roading) and these plans are maintained, reviewed and updated on an annual basis. The plans provide a long-term view of asset management and specific work programmes for the next 10 years.

Hauraki District Council is currently developing the Asset Management Plans from 'basic' to an 'advanced' level. The focus is on improving or updating recorded knowledge of all key assets on an on-going basis.

Asset Management Plans provide information for each Hauraki Community Plan on the 10 year forecast level of maintenance, renewal and capital expenditure. This ensures assets are properly maintained and developed to deliver agreed levels of service.

Now that the Community Outcomes have been identified, the Asset Management Plans will be reviewed to ensure they are consistent with them.

ACTIVITY PLANS

Council has many service delivery activities other than the delivery of infrastructural and community services.

Council will be developing Activity Plans for these services that will act in the same way as Asset Management Plans.

Community Outcomes

Hauraki District Community Outcomes

ANNUAL PLAN

The Annual Plan informs stakeholders of the planned aims, intended activities, performance, income and expenditure required for a period of one financial year. An Annual Plan is required to be produced in each of the two years between the publication of the Hauraki Community Plans.

ECONOMIC DEVELOPMENT STRATEGY

The Council adopted an Economic Development Strategy in May 2002.

Council's goal is to recognise possibilities, develop projects and partnerships for economic development together with other organisations where there is benefit. This strategy will be reviewed in the 2006/07 and 2007/08 period.

LAND TRANSPORT PROGRAMME

The Council prepares an annual Land Transport Programme. This is a maintenance, renewal and capital development programme for subsidised works spanning a 10 year period. This programme is considered by Land Transport New Zealand in the course of the approval of Council's financial assistance from the National Roads Fund.

The content of the 2006/07 Land Transport Programme is incorporated in the 2006-16 Hauraki Community Plan 2006-16. The consultation process of the 2006-16 Hauraki Community Plan 2006-16 serves also to satisfy the consultation requirements for the Land Transport Programme in terms of Sections 15 and 16 of the Land Transport Management Act 2003.

SOLID WASTE MANAGEMENT PLAN

Council adopted a Solid Waste Management Plan on 10th June 2002. It promotes the sustainable management approach of reduction, recycling, recovery, treatment, and finally disposal of solid waste. This plan is to be reviewed in the 2006/07 year.

Waikato Regional Community Outcomes

CHOOSING FUTURES WAIKATO

At the same time as consultation in Hauraki District to identify local Community Outcomes, additional consultation has been taking place at the regional and Iwi levels. Twelve territorial authorities of the Waikato region, together with the Waikato

Regional Council (Environment Waikato), jointly coordinated a process in 2005 to identify regional level Community Outcomes. The Regional Community Outcomes process is called 'Choosing Futures Waikato'. Participating council areas are shown in the map on the next page. Choosing Futures Waikato is a joint project of the district councils of Franklin, Hauraki, Matamata-Piako, Otorohanga, Rotorua, South Waikato, Taupo, Thames-Coromandel, Waikato, Waipa and Waitomo, Hamilton City Council and the regional council Environment Waikato.

This partnership has been unique to the Waikato Region. The discussions and liaison that have occurred between agencies have helped to establish good relationships and have provided a strong foundation to the continuation and further development of good working relationships.

HOW WERE THE WAIKATO REGIONAL COMMUNITY OUTCOMES IDENTIFIED?

A draft set of Waikato Regional Community Outcomes was identified during 2004/05 through a series of regional visioning workshops followed by meetings of a broadly representative Community Outcomes Working Group.

The process included consultation with Iwi in the region, information collected by local councils through consultation with their local communities, and information from key organisations including central and local government, businesses, industry groups and community organisations. A draft set of Waikato Regional Community Outcomes was reviewed by key stakeholders and promoted for community feedback before being signed off in November 2005. The Waikato Regional Community Outcomes are grouped under five themes:

- Sustainable Environment;
- Quality of Life;
- Sustainable Economy;
- Culture and Identity;
- Participation and Equity.

WHAT HAPPENS NEXT?

The Waikato Regional Community Outcomes are broader than Council activities or local issues. They cover the overall social, economic, environmental and cultural well-being of the Waikato Region. The Regional Community Outcomes sit alongside and supplement local Community Outcomes identified within each local authority area. Their purpose is to help guide community stakeholders in planning and monitoring regional community well-being right across the whole Waikato Region.

Government agencies, local councils and community organisations will be encouraged to use the Waikato Regional Community Outcomes for guidance on their planning and help to identify the sorts of services the community have stated as most needed in the Waikato Region.

Progress made towards achieving the Waikato Regional Community Outcomes will be measured regularly and reported back to Waikato

Community Outcomes

Waikato Regional Community Outcomes

communities. This monitoring will be an important way of ensuring that together we are making progress, while identifying areas for improvement. Councils, government agencies, Iwi, community organisations and other groups will be working together to make the Waikato Region the best it can be, now and in the future.

REGIONAL OUTCOMES MONITORING

As part of the Regional Community Outcomes process a working group has been established called the 'Monitoring and Reporting Community Outcomes' (MARCO).

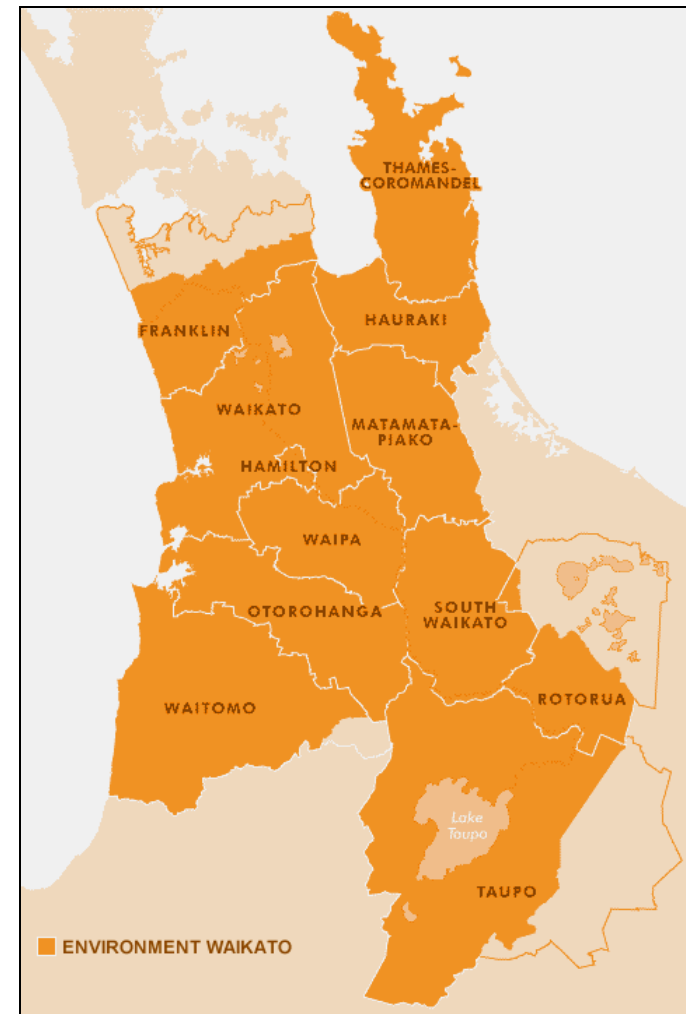

The purpose of MARCO is for Councils in the region to work together cooperatively to ensure that the best possible coordination for the gathering and sharing of information occurs.

MARCO will consider the gathering of information, data management, analysis and interpretation, reporting and making recommendations on current and proposed monitoring strategies and indicators.

FURTHER INFORMATION

The complete set of Waikato Regional Community Outcomes is available in Appendix 6 on page 223 . For further information about the 'Choosing Futures Waikato' process, visit www.choosingfutures.co.nz or contact:
