

2.0 Objectives

The objectives of the WMP are:

- to ensure the provision of effective and efficient systems of solid waste management in the District
- to minimise the generation of waste within the District by application of the waste management hierarchy to reduce, reuse, recycle, recover, treat and dispose of wastes
- to manage the cross boundary effects of waste management policies and methods
- to manage the cross media effects which may occur as a result of waste management policies and methods
- to assist sustainable development via the use of suitable economic instruments
- to achieve intergenerational equity by appropriate apportionment of costs to the community
- to ensure that the management of waste does not become a nuisance or be injurious to public health
- to consider energy efficiency with regard to cross media effects.
