Dear Glenn

Boffa Miskell

KAIMAI WIND FARM LANDSCAPE AND VISUAL EFFECTS ASSESSMENT: PEER REVIEW

I have acted as peer reviewer of the Landscape and Visual Effects Assessment for the Kaimai Wind Farm Rotokohu Road, Paeroa, which was prepared by Mike Moore Landscape Architect.

My peer review has involved:

- An initial review of the first draft of the landscape and visual effects assessment report;
- Review of the visual simulations prepared for Ventus Energy by Energy 3 Services Limited;
- A day's site visit with Mike Moore where we walked over part of the wind farm site and then drove around the visual catchment area and visited the representative viewpoints that Mike Moore had identified on previous site visits;
- Several telephone conversations and emails with Mike Moore following our site visit regarding matters raised during the site visit and suggestions on the structure, content and findings in relation to the second draft of his assessment;
- A comprehensive review of Mike Moore's second draft of his landscape and visual effects assessment (dated 5 February 2018);
- As a result of various amendments to the wind farm proposal, together with a review of technical reports prepared by other specialists; Mike Moore revised his landscape and visual effects assessment; I reviewed the amended sections;
- I also completed a review of his final assessment report, dated 14th June 2018.

Yours sincerely
