**Roadside Weed Spraying - Conditions for a 'No-Spray' Zone**

*In gaining approval to be added to the Hauraki District Council No Spray Register, the resident agrees to take over the responsibility for:*

- eradicating all noxious and pest plants.
- keeping the road frontage clear and tidy (up to and including the kerb).
- keeping drainage paths free of obstruction and fully operational at all times.
- keeping vegetation clear around signs, posts and other road furniture where a mower cannot easily reach. A distance of one metre around the feature is typically appropriate.
- ensuring that, where the owner opts to purchase 'no-spray' markers, these remain clearly visible to the spraying contractor.

*If the above conditions are not maintained and the spraying contractor observes an overgrown frontage at the time of spraying, the resident may be invoiced for additional costs associated with the spraying contractor returning to spray the area as normal.*

*To ensure the spraying contractor can easily recognise your property frontage as a no-spray zone, Council can supply signage demarcating the no spray zone in the road reserve adjacent to your property. Costs for the signage is in the order of \$37.00, and is to be paid for and installed by the applicant. It is the responsibility of the resident to ensure that these marker signs remain clearly visible at all times. Please contact Council to arrange payment and collection of the markers.*

*Applicants will be required to reapply for continuation of 'No-Spray Zone' status every two years to ensure Council records are kept up to date and accurate.*
