## 1 INTRODUCTION

This report presents an analysis of concerns and complaints received by OceanaGold (New Zealand) Limited Waihi Operation between July - December 2024 to meet the requirements of its various consents and licences.

Mining Consents and Licences:

- Martha Mine Extended Project ML 32-2388
- Correnso LUC 202.2012
- Project Martha LUC 202.000002018.857.001
- Waihi North Project MP-60541

The report summarises all complaints received during the six-month period, actions taken by the consent holder, and any resolutions. Other matters of concern raised by the community are also reported including any mediation entered by the consent holder and others with respect to operational matters and mediation outcomes (unless the parties have agreed to keep such confidential).

Section A reports on the complaints received in respect of the Martha operations. One complaint was received during the reporting period.

Section B reports on the complaints received from the Correnso Project operation. Two complaints were received during the reporting period.

Section C reports on the complaints received from residents living in the Project Martha area. Twenty-one Twenty-four complaints were received during the reporting period.

Section D reports on complaints received from residents living in proposed project areas. Twelve complaints were received during the reporting period.

Section E reports on any concerns raised by residents (people who do not wish to make a formal complaint but have raised the matter as a concern only). 8 concerns were received during the reporting period.

### Managing Complaints

Currently the procedure for receiving complaints continues to be:

The Waihi Operation Community Engagement Line is a twenty-four-hour service that deals with queries, concerns, and complaints. This service was initiated as part of our original consent conditions. It provides an important way for members of the community to contact us.

All complaints and concerns regarding the mining operations and exploration activities, are received by the Company Liaison Officer (CLO). A free phone number (0800 924 444) was established to simplify the Waihi community's access to the Waihi Operation. The service is available on a twenty-four hour seven days per week basis. If a call is made before 9.00am, or after 4.00pm, it is diverted to an answerphone.

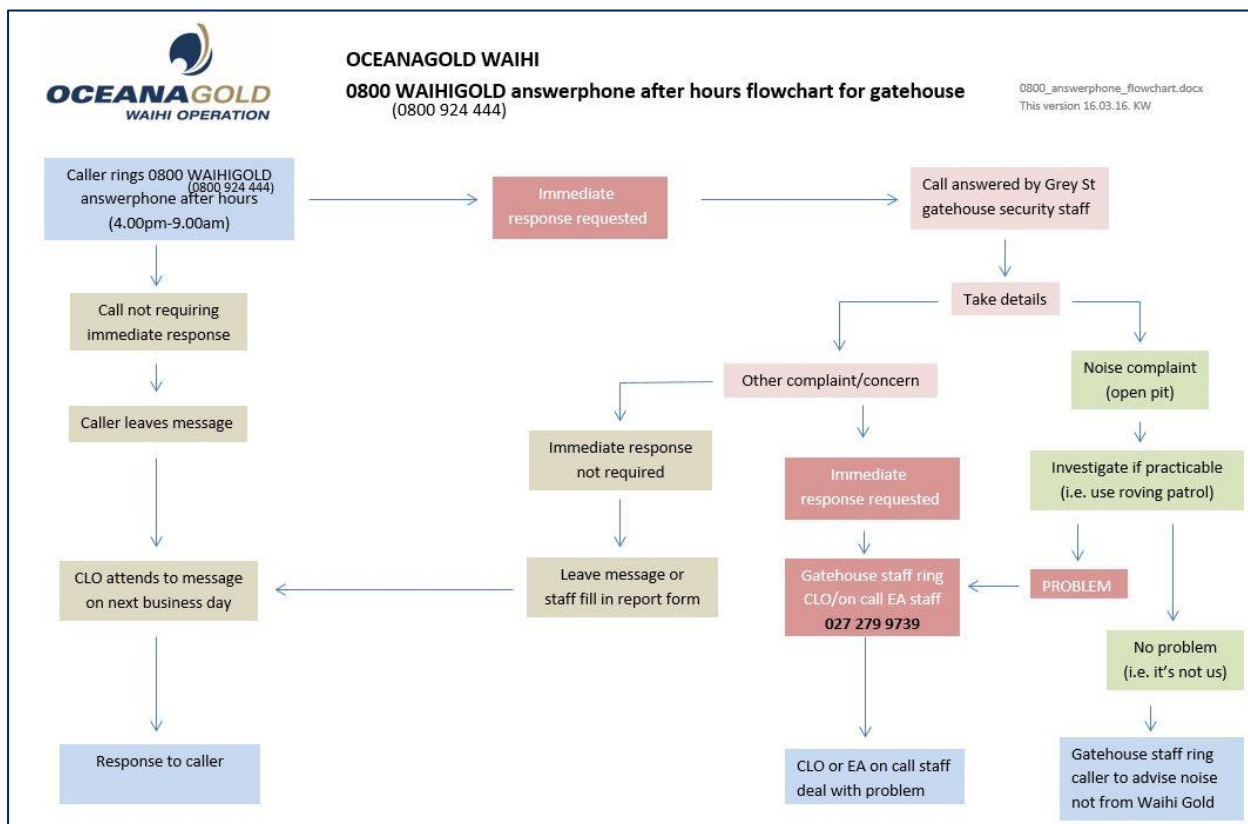

External Affairs and Social Performance (EASP) staff are rostered to cover weekends, public holidays, and the CLO's absence. In addition, Waihi Operation main office phone is available between 8:00am and 5:00pm during the working week.

If a call does not require an immediate response (for example complaining about blast vibration) information can be recorded on the answerphone and is logged with a selection menu for attention by the

community team on their next day of work. A member of the Community team will get back to the caller the next business day if this has been requested.

If a concern or complaint needs to be dealt with immediately (for example a noise complaint) by pressing “1” a caller will be connected to a member of our security staff. A roving patrol can be dispatched to check on any noise sources on site, and if necessary, will contact the CLO or if a weekend, a member of the community team.

The flow chart below was designed to walk people through the process. This process continues to work well without any major problems.

The 0800 Community Engagement Line contact phone number is currently printed in the monthly update newsletters published in the HC Post, monthly Mining Matters newsletter and in promotional material on the OceanaGold Website and our Facebook page.

Complaints and concerns received by the Waihi Operation are registered and then logged into the complaints database. Complainant details are recorded, as is the nature of the complaint or concern and all are acted upon. Sound monitoring is undertaken (if required) after receipt of a noise complaint, and blast vibration data is obtained from Blasthub following a blasting-related complaint. The Envirohub vibration monitoring system (VMS), previously called Blasthub, has been utilised as the blast vibration monitoring system since 1 January 2005 (HDC approval reference 64.601.001 dated 8/3/05). The system provides real-time, web-based monitoring that is accessible to both HDC and OGNZL and includes automatic email notification of blast events that trigger two or more monitors. Results from blast monitoring are automatically loaded onto Envirohub from the vibration monitoring network, along with manual loading of details of the blast design and plan. Heilig and Partners Pty Ltd compares the corresponding plans/results and provides an external review, developing recommendations when necessary for on-going blasting plans and procedures to ensure compliance (with a safety margin).

The source of the effect is investigated and located wherever possible and appropriate mitigation action taken where practicable. All the relevant monitoring data and mitigation actions are recorded in the database. Complainants are informed of the monitoring results, the outcome of any investigation and the mitigation action taken.

Information in this report that identifies and relates to private individuals is expected to be kept confidential.

## 1.1 Vibration

Specific actions taken during the reporting period to maintain and improve blasting practices and systems continue to be:

- Blasthub continues to provide blast results in real time. The vibration monitoring hardware system and web-based reporting system have been installed for all mining areas. The system reports real-time vibration data for review and verification, records blast design parameters, provides for recording of complaints and allows effects from proposed blast designs to be assessed prior to firing.
- The Blast Vibration Mitigation Plan ensures existing procedures can be reviewed using recent vibration history and ‘tightening’ of blast design parameters to reduce vibration levels if required.
- The CLO continues to give advanced warning of production (stope) blast events to those residents living within operational project areas, who wish to be kept informed along with schools and various businesses around town. Blast notification warning devices have been distributed to residents who had requested them and are working well. Other tools used for notification include email and text.
  - As the Martha Mine was not operational during the reporting period, no residents needed to be notified.
  - Project Martha Underground operations - 18 by text and 13 by email.
  - Correnso Underground operations - 16 by text and 5 by email.
  - Blast times are also loaded daily onto the Waihi Operation website and can be found at [www.waihigold.co.nz](http://www.waihigold.co.nz)
- A map of the Correnso Underground development along with a map of the Martha Underground and associated surface monitoring networks are available on the Waihi Operation website so residents can visualise where mining operations and blasting is taking place.
- Under Condition 22 a) of the Correnso Consent Conditions and Condition 48 of the Project Martha Consent Conditions, at the start of each calendar month a two-dimensional plan showing the existing mining and the proposed areas of mining activities during that month are loaded in the monthly publications (Mining Matters).
- Printed copies of Mining Matters are circulated to over 1,000 properties. Electronic copies are emailed to 36 business owners, 57 other interested parties, including residents and Hauraki District Council.
- Hard copies are also available at the Gold Discovery Centre, Hauraki District Council Offices, and Real Estate Agents in Waihi and Waihi Beach.

Six vibration complaints were received during the reporting period, all from properties within the Project Martha area.

*Note: Refer to Appendix 1 for details of complaints.*

## **1.2 Felt & Heard**

One complaint was received from the Project Martha mining area.

*Note: Refer to Appendix 1 for details of complaints.*

## **1.3 Noise**

Eighty-six noise complaints were received during the reporting period.

*Note: Refer to Appendix 2 for details of complaint.*

## **1.4 Property**

One property complaint was received during the reporting period from the proposed project area.

*Note: Refer to Appendix 2 for details of complaint.*

## **1.5 Air Quality**

One dust complaint was received during the reporting period.

*Note: Refer to Appendix 1 for details of complaint.*

## **1.6 Concerns**

Seven concerns were received during the July - December reporting period, all from the Project Martha mining area.

One vibration concern was received from a resident in Barry Road made the house creak.

Four property concerns were received, all from within the Project Martha project area.

One staff behaviour concern was received during the reporting period.

One communication concern was received.

*For details and mitigating actions please refer to the concerns summary in Appendix 3 of this report*

## **2 SECTION B – MARTHA MINE COMPLAINTS**

### **2.1 Summary Results**

With limited work and no blasting being carried out in the open pit, no complaints were received during the July – December 2024 reporting period.

### **3 SECTION C – CORRENZO UNDERGROUND MINE**

#### **3.1 Summary Results**

With limited work and blasting being carried out in the Correnso mining area, no complaints were received in relation to the Correnso Underground mining area during the July – December reporting period.

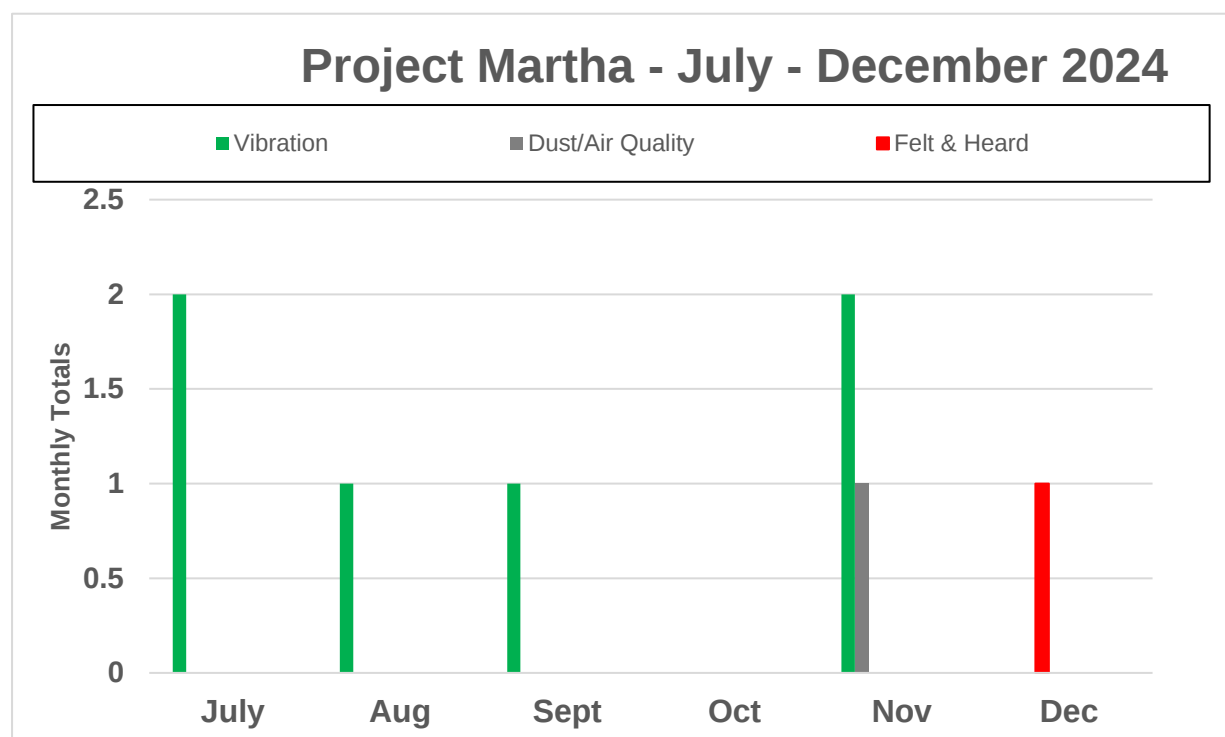

## 4 SECTION D – PROJECT MARTHA

### 4.1 Summary Results

Complaints received during the July - December 2024 reporting period are summarised in the table below.

| Type         | Number   | Period          |
|--------------|----------|-----------------|
| Vibration    | 6        | July - November |
| Felt & Heard | 1        | December        |
| Air Quality  | 1        | November        |
| <b>Total</b> | <b>8</b> |                 |

**Table 1: Summary results of complaints by type received during the July – December 2024 period from the Project Martha area.**

**Figure 1: Project Martha complaints by month for the July – December 2024 reporting period**

### 4.2 Vibration

Six vibration complaints were received from 6 separate locations. All complaints were related to blasting within the Rex and Martha Underground areas of the mining operation.

*For details and mitigating actions please refer to complaint's summary in Appendix 1 of this report.*

### **4.3 Felt & Heard**

One felt & heard complaint was received from a Moresby Avenue resident who rang to say the evening development blast was later than usual and was very loud at their location.

*For details and mitigating actions please refer to complaint's summary in Appendix 1 of this report.*

### **4.4 Air Quality**

One dust complaint was received from a Trig Road North property owner, who complained about dust nuisance from the TSF1A crest raise lift.

*For details and mitigating actions please refer to complaint's summary in Appendix 1 of this report.*

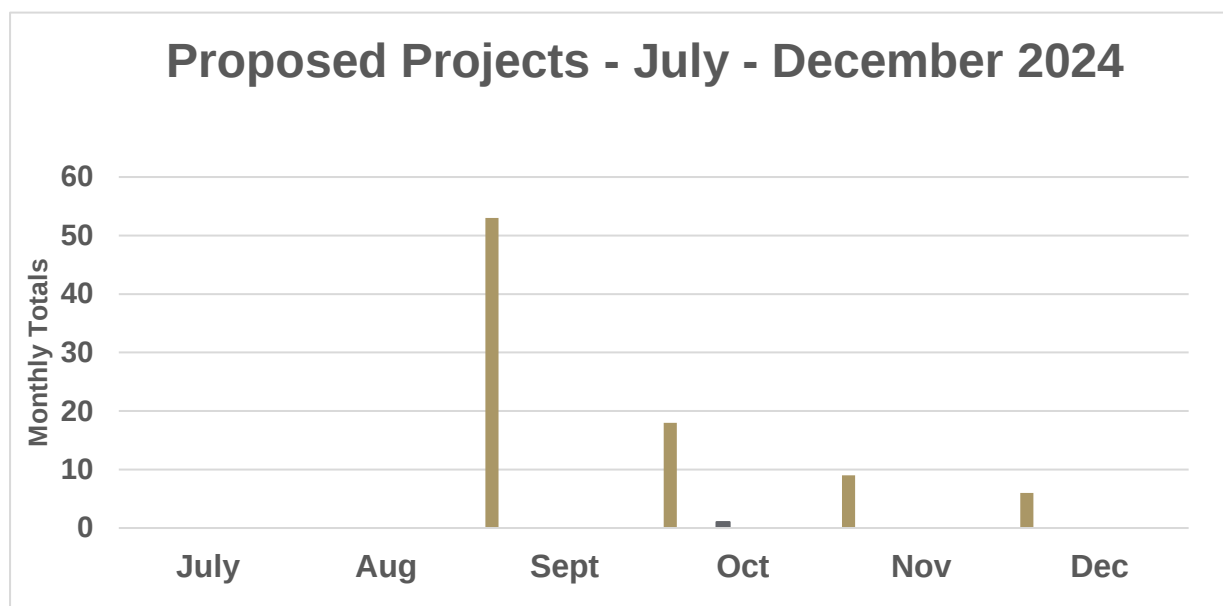

## 5 SECTION E – PROPOSED PROJECT COMPLAINTS

### 5.1 Summary Results

Complaints received July - December 2024 from the proposed Waihi North Project are summarised in the following table.

| Type         | Number    | Period               |
|--------------|-----------|----------------------|
| Noise        | 86        | September - December |
| Property     | 1         | October              |
| <b>Total</b> | <b>87</b> |                      |

**Table 2: Summary results of complaints by type received during the July - December 2024 period from activities related to the Proposed Waihi North Project.**

**Figure 2: Proposed Waihi North Project complaints by month for the July – December 2024 reporting period**

### 5.2 Noise

Eighty-six noise complaints were received during the reporting period from 2 separate location, eighty five of the eighty-six complaints received were from the same resident. All complaints received were from helicopter movements in and out of the Waihi North Project area.

It should be noted that of the eighty-six complaints recorded, eighty-five of these came from one resident making up 99% of total noise complaints received.

*For details and mitigating actions please refer to complaint's summary in Appendix 2 of this report.*

### 5.3 Property

One property complaint was received from a Willows Road resident not happy with drone activity over his property without gaining permission to do so. A discussion and a plan going forward for this activity took place with the property owner.

*For details and mitigating actions please refer to complaint's summary in Appendix 4 of this report.*

## Section f – Concerns Raised

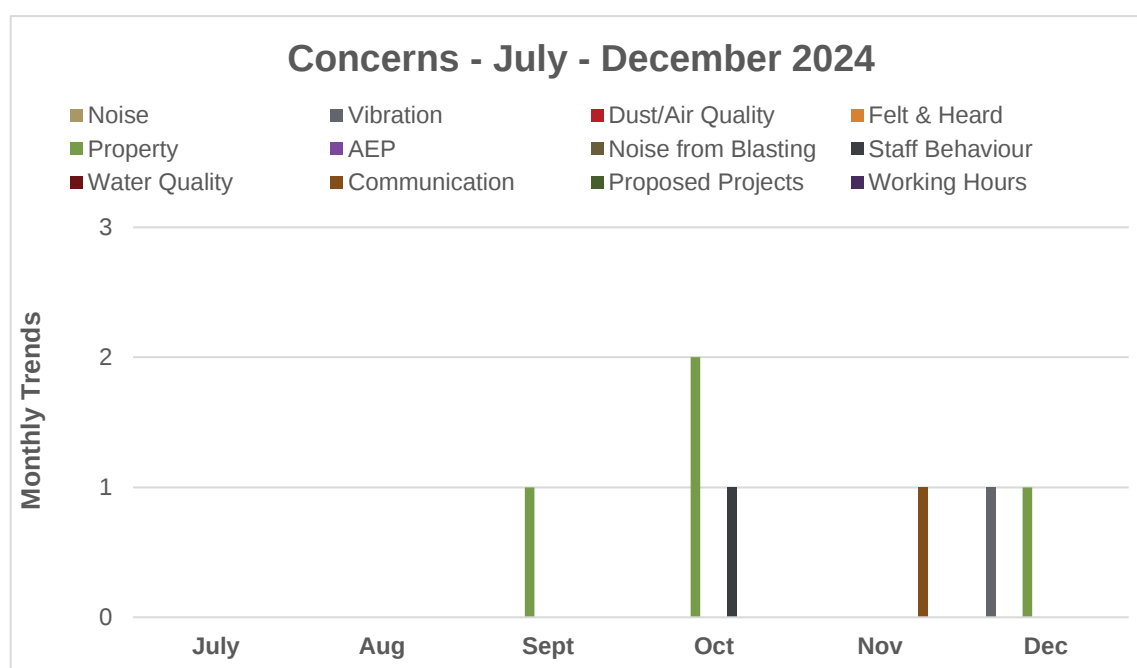

Concerns are defined by residents who do not wish to make a formal complaint but have raised the matter as a concern only.

### 5.4 Summary Results

7 concerns were received during the July - December reporting period, all from within the Project Martha area. These are summarised in the following table.

| Type            | Number   | Period               |
|-----------------|----------|----------------------|
| Property        | 4        | September - December |
| Vibration       | 1        | December             |
| Staff Behaviour | 1        | October              |
| Communication   | 1        | November             |
| <b>Total</b>    | <b>7</b> |                      |

**Table 3 Summary results of concerns raised by type received during the July - December 2024 period.**

**Figure 3: Concerns by month for the January – June 2024 reporting period.**

### 5.5 Property

Four property concerns were received during the reporting period, 3 from around the Project Martha mining area and 1 concern from the Martha Open Pit operation.

A Kenny Street resident rang concerned about her ceiling cracking. When offered a property inspection the resident declined the offer and just wanted her concern logged.

A Mueller St property owner was concerned about the retaining wall at the rear of their property was slumping. This property backs onto an OceanaGold property.

The retaining wall was replaced due to wear and tear not mining related operations.

A Mackay Street resident visited the OceanaGold Project Office to say she was concerned about cracking to some interior parts of her house.

The Company Liaison Officer arranged a property inspection by Graeme Blissett (Building Surveyor), this was carried out and a report containing his findings was provided to the property owner.

A Dobson Street resident rang to say she was concerned about slumping over an extended period of 30 years to her Housing NZ owned property. This resident has rung on several occasions with the same concern. It was inspected by an OceanaGold representative in 2022 with no settlement identified

*For details and mitigating actions please refer to complaint's summary in Appendix 3 of this report.*

## **5.6 Vibration**

One vibration complaint was received during the reporting period, from a Barry Road resident, who was concerned about a blast he felt from Project Martha mining operations.

*For details and mitigating actions please refer to complaint's summary in Appendix 3 of this report*

## **5.7 Staff Behaviour**

One concern was received during the reporting period

The concern received was from a resident living near the old Tenex Yard in Gilmour St, who was concerned about contractors using what he called unstable scaffolding and the lack of safety equipment. The Company Liaison Officer sent the contractors OceanaGold representative to inspect the work being done. Upon inspection, all the necessary safety equipment was in place. This was relayed to the resident.

*For details and mitigating actions please refer to complaint's summary in Appendix 3 of this report*

## **5.8 Communication**

One concern was received by a Kenny Street resident who rang to ask why OceanaGold were blasting at 10.30am and why there was no blast notification of the website.

The website had a temporary fault which was repaired, and a copy of the consent conditions delivered to the resident.

*For details and mitigating actions please refer to complaint's summary in Appendix 3 of this report*

| 30/09/2024 | 12:35:00 PM | Fisher Rd | Complaint | Noise | D Fisher and J Wiki visited property on 26 September to discuss the TSF1A lift starting work. Nobody was home so left a card in the letterbox. Property owner rang D Fisher back and she explained about the Tailings Facility rise. While speaking with he, he complained about the noise from the helicopter taking off and landing at the Mill area. Asked if we could use a quieter helicopter, it seemed noisy compared to some he has seen at Field Days. He added that as it was only a temporary measure, probably not too bad. Donna said this would be going on for quite some but she would list his complaint and report it to the appropriate person. | D Fisher | C Steward | Exploration Supervisor | Noise | Taking off and landing at Mill Heli Pad | Reported to C Steward and logged as a complaint.                                                                                                                                                                            | Proposed Projects | 30/09/2024 | 12:35:00 PM | D Fisher | Company Liaison Officer | Thanks for letting me know. I will log and report your complaint for you and pass on your comments.<br>Sent email:<br>Morning<br>Thought you may like to know the following regarding the helicopter activities in the area as part of our ongoing operations and recent requests from residents requests to modify our flight paths.<br>From these requests we've made best endeavours to adjust our regular flight paths to be considerate of the community's amenity, while still recognising that our helicopter activities serve essential exploration needs and are an operational necessity that will continue.<br>OceanaGold Waihi contracts our helicopter activities to SkyWorks, who operate under strict requirements set forth by the Civil Aviation Authority. Our helicopter operations remain in compliance with these requirements.<br>While we strive to adhere to |            |            |

| 11/10/2024 | 3:22:00 PM | Willows Rd | Complaint | Property | Phone call received from Willows Rd resident, stating a drone was flying over his property, and we hadn't sought his permission to do so.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | K Welten | K Welten  | Manager EASP           |       | Drone Activity | Complaint logged and reported to management. Kyle followed up immediately with Nigel Neame who was the pilot, he advised he was flying within the Road Corridor which he had permission to do - not directly over 122 Willows Rd. I advised Nigel that typically we like to provide courtesy notification to the landowners the day of flying regardless, he agreed to let us know prior next time, and agreed to finish for the day so as to not disturb the neighbour further. The current permit does include the landowner as a key stakeholder that should be informed.<br>Communication breakdown going forward these landowners will be notified. | Proposed Projects                                                                                                                                                                                                                                          | 14/10/2024        | 1:29:00 PM | K Welten   | Manager EASP | Hi<br>Firstly, apologies again you weren't notified of the proposed drone activities. I'm very keen to talk through what might be the best process for ensuring you are fully aware of any drone work before it takes place (and that we've sought your consent prior, where required). Unfortunately I've been out of the office this morning, and I'm about to head into meetings for the remainder of the day. I am free after 2pm tomorrow if that works for you?<br>Kyle<br>Hello Kyle,<br>I am in the office today until 3.30 pm and would welcome your call.<br>I do think it's important to convey what I observed of Fridays activities and my concerns, I think I can speak for my neighbours the when setting out what we are experiencing.<br>Cheers. | 11/10/2024                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 3:22:00 PM |            |
| 24/10/2024 | 4:21:00 PM | Wharry Rd  | Complaint | Noise    | Email received in response to OGL email recontacting Civil Aviation:<br>Good afternoon Donna<br>Moving forward I will continue to notify OceanaGold of any noise complaints that affect me and my livestock from OceanaGold mining or exploration activities.<br>Basically the noise from the helicopter all depends on the flight path and altitude of the flight and the wind speed and direction at the time.<br>Anyway please see the list below of a further seven separate noise complaints regarding the contracted helicopter flying for OceanaGold near and sometimes our property like at 7.25am today!<br>Sunday 6 October 2024<br>At 7.54am flying to mill.<br>At 8.01am flying to WKP.<br>Tuesday 8 October 2024<br>At 8.52am flying to WKP.<br>At 4.48pm flying to WKP.<br>Monday 14 October 2024<br>At 8.49am flying to WKP<br>At 8.59am flying to mill.<br>Thursday 24 October 2024<br>At 7.25am flying over farm to mill.<br>Regards<br>Andrew Wharry | D Fisher | C Steward | Exploration Supervisor | Noise |                | Skyworks<br>Helicopter<br>working for OGL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | C Steward to investigate complaints, only to ascertain if the complaints made was from OGL activities. | 13/11/2024 | 8:11:00 AM  | Willows Rd    | Complaint | Noise        | Text received: "We weren't impressed this morning with two helicopter flights in and out prior to 6.30AM". Spoke to the Geological Services Superintendent who confirmed there was an Alton shift change, and flights went over the Willows Rd area around 6.20AM. SkyWorks advised they needed to take an alternative route than usual due to cloud cover.                                                                                                                                                                                                                                                                                                                                                                                             | K Welton | C Steward  | Exploration Supervisor       | Noise       |                                     | Spoke to the Geological Services Superintendent who confirmed there was an Alton shift change, and flights went over the Willows Rd area around 6.20AM. | 12/11/2024 | 3:00:00 PM  | Trig Rd North | Complaint | Dust         | Complained about the dust from the TSF1A crest raise. Said she was sick of cleaning her windows. Seemed to be worse at night.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | D Fisher | S Reynolds | Environmental Officer        | Air Quality | TSF1A Crest Raise                   | Checked with Environmental Department re dust levels from the month of October (results for November will not be available until the end of the month). Levels were normal and well within compliance for this time of year. Camera has been reactivated at Development Site to keep any eye on Contractors working on the TSF to ensure water cart use is constantly operational. There are two deposited particulate monitoring sites between TSF1A and the complainant. These have a trigger limit of 4 g/m2/month. The latest results for Oct:<br>•B.71 Morrison – 1.4 g/m2, higher than Sep but similar to Oct 2022<br>•B.73 TSF East – 0.5 g/m2, similar to Sep and lower than Oct 2022 | Project Martha                               | 14/11/2024            | 3:42:00 PM                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | D Fisher       | Company Liaison Officer | Email sent:<br>Afternoon<br>I followed up your complaint about the dust levels at your property and the fact you are sick of cleaning your windows.<br>We have spoken to the Contractor and reiterated the importance of the water cart, they have assured us they are using the cart often.<br>Last month's dust results were well within compliance, however let me know if this continues and I will follow it up for you.<br>Donna<br>Text received: Thanks for looking into it for me, do you know where they monitor the dust from?<br>Text sent: The closes monitor to your property is 800m at the back of Baird's farm. |                             |                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |            |            |
| 14/11/2024 | 2:02:00 PM  | Elliot St     | Complaint | Vibration    | Email Received:<br>Hey Donna,<br>We have been feeling the blasts a lot more frequently over the past few months.<br>Today's blast at 1.45pm seemed to be the biggest we have felt yet. More of a scary earthquake feeling as the house shook and animals freaked.<br>Our concerns as property owners is the future of our foundations and concrete pool should small damage be happening frequently over time we imagine this could lead into bigger issues further down the track creating potential on sale and insurance problems for us.<br>Can we please request a monitor to be put in around our area (Elliot Street) so we can be sure that the vibrations from blasting is not effecting our property.<br>Any dramas please phone me<br>Thanks | D Fisher |            | Company Liaison Officer      |             | Islington Tce                       | Central School                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Yes                                          | Blast in Martha North | Spoke to Environmental Dept, they will install a roving monitor at this property next Tuesday. They will ring property owner on Tuesday morning to arrange the installation. Installation took place.<br>On 14 November 2024, roving vibration monitor was placed at 1 Elliot Street, Waihi for a period of two weeks, from 19 Nov to 3 Dec 2024. This was in response to a request from the resident on 14 Nov 2024, over concerns about potential structural damage to their house foundations and concrete swimming pool, following the mid-shift blast (4.95mm/s at Central School).<br>Twenty Martha Underground blast events occurred during the 2-week monitoring period, of which only two triggered the nearest permanent monitoring locations. The roving monitoring was not triggered by any of these blasts. The vibration monitors are set to trigger at 0.75mm/there were 154 blast events in the 3 months to 14 Nov 2022..The majority of the blasts during the 3-month period resulted in vibration of less than 2mm/s. The maximum vibration measured was 4.95mm/s at Central School.<br>Resource consents set a PPV limit of 5mm/s | Project Martha | 14/11/2024              | 4:05:00 PM                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | D Fisher                    | Company Liaison Officer      | Email sent:<br>Good Afternoon<br>I have logged your complaint and this will be reported to our Management Team and logged in our database.<br>What number Elliot St are you? I will ask the Environmental Department to ring you and arrange a time to install a roving vibration monitor on your property.<br>As for any damage to your property or pool, blasting levels are set at a level that would not cause any structural damage. However, for your comfort OceanaGold has a We Break we Pay Policy, so if it were proven we had created any damage we would have to pay for it to be fixed. I have attached the link to this policy on our website for your convenience..<br><a href="https://www.waihigold.co.nz/uploads/documents/project-martha/Property-Policy-2024.pdf?_cchid=98f853395d5a50893a185d22575f695">https://www.waihigold.co.nz/uploads/documents/project-martha/Property-Policy-2024.pdf?_cchid=98f853395d5a50893a185d22575f695</a> | 14/11/2024 | 1:44:00 PM |
| 14/11/2024 | 2:17:00 PM  | Mackey St     | Complaint | Vibration    | Rang to say they had just had a big shake at the house, asked if that was a blast. Explained that we had a blast in the MUG area. It really was big and I heard it too.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | J Wiki   | J Wiki     | Community Engagement Officer | Vibration   | Central School                      | Central School                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Yes                                          | Blast in Martha North | Logged complaint and reported to management.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Project Martha | 14/11/2024              | 2:17:00 PM                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | J Wiki                      | Community Engagement Officer | Thanks for calling, I will log and report your complaint.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 14/11/2024 | 1:44:00 PM |
| 17/12/2024 | 7:59:00 PM  | Moresby Ave   | Complaint | Felt & Heard | Text received: Well that was later than usual and quite loud.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | D Fisher | D Fisher   | Company Liaison Officer      | Vibration   |                                     | Development blast                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Complaint logged and reported to Management. | Project Martha        | 17/12/2024                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 8:00:00 AM     | D Fisher                | Company Liaison Officer                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Thanks, I will log that for | 17/12/2024                   | 7:55:00 PM                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |            |            |
