

Ask the Experts about... Air Quality – Waihi North Project

If the Waihi North Project is approved, we expect to monitor and manage air quality in accordance with an Air Quality Management Plan that would need to be approved by Waikato Regional Council. The Waihi Operation has been effectively monitoring inhalable gasses or particulates to meet strict air quality consent limits in the vicinity of Waihi operations since 1982.

On Thursday the 25th of May, between 9:00am and 3:00 pm, Richard Chilton from Tonkin and Taylor will be available in our Project Information Office at 86 Seddon Street, Waihi, to answer any questions you might have on air quality relating to the Waihi North Project.

Richard is an air quality scientist and Certified Air Quality Professional with over 20 years of experience assessing environmental impacts of air discharges in New Zealand, Fiji, Australia, and the United Kingdom. He has been extensively involved in assessing the discharges to air from industrial and transport related projects, undertaken science related projects for regional councils, as well as regional air quality policy reviews for industrial and council clients.

Richard holds a MSc. (Hons) in Environmental Science, is a CASANZ member, and a Certified Air Quality Professional (CAQP).

A NUMBER OF TIMES ARE AVAILABLE, BUT BOOKING IS ESSENTIAL

Bookings can be made via 0800 924 444, waihi.info@oceanagold.com or by visiting the Project Information Office.

ECHO Walking Festival - A walk through Martha Mine Pit Fence

This year's walk inside the Martha mine pit fence saw a great turnout, and offered the chance to see some views of the Martha pit that can't be seen any other way.

Our thanks go to Sport'n'Action Waihi and everyone at the Echo Walking Festival for making this year's event such a success, our staff who guided participants and fielded questions, and the members of the public who took the time to come out and say hello.
