

Hauraki District Council Building and Resource Consents

Prepared by: Versus Research

October 2022

Summary

Background

Hauraki District Council (Council) commissioned Versus Research (Versus) to conduct a survey amongst residents who have lodged building or resource consents within the 12 month period from July 2021 to June 2022. The survey looks at applicants' perceptions and satisfaction with both the building and resource consent processes.

Method and Sample

Interviewing for this project was completed in two waves. Wave 1 was completed in March 2022 and includes responses from people who applied for a consent between July and December 2021. Wave 2 was completed in September and includes responses from people who applied for consents between January and June 2022.

The contact details for both waves of interviewing were supplied to Versus by Council. A total of n=171 interviews were achieved in Wave 1 (n=116 responses for building consents and n=55 for resource consents) and n=156 responses were achieved for Wave 2 (n=132 responses for building consents and n=24 for resource consents).

Reporting

This report presents the combined results for both Wave 1 and Wave 2 and includes comparisons to results from previous years.

A total satisfied rating has been included next to the full results for satisfaction of service as well as the process and application measures. This rating shows the combined result of 'somewhat satisfied', 'satisfied', and 'very satisfied' ratings.

The labels on charts for extremely small proportions (2% or less) are not shown as they can overlap the area allocated to them, making the labels unreadable. It should also be noted that not all percentages shown add up to 100%. This is due to rounding and/or occurs where questions allow multiple responses (rather than a single response).

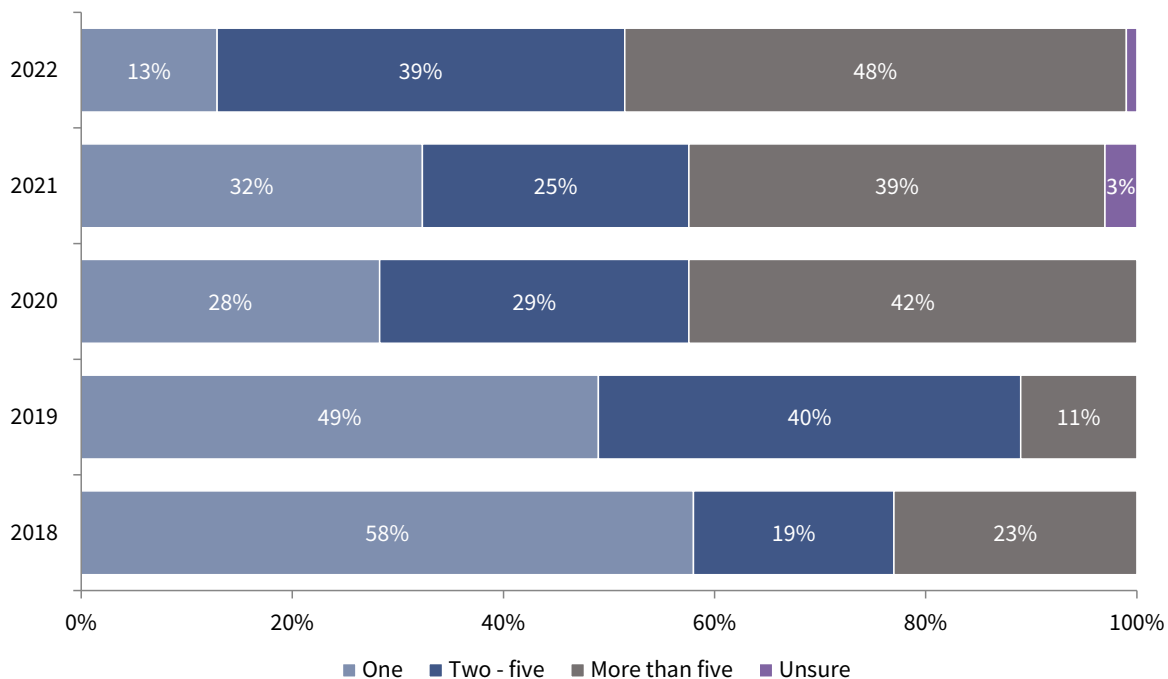

Building Consents

Building Consents

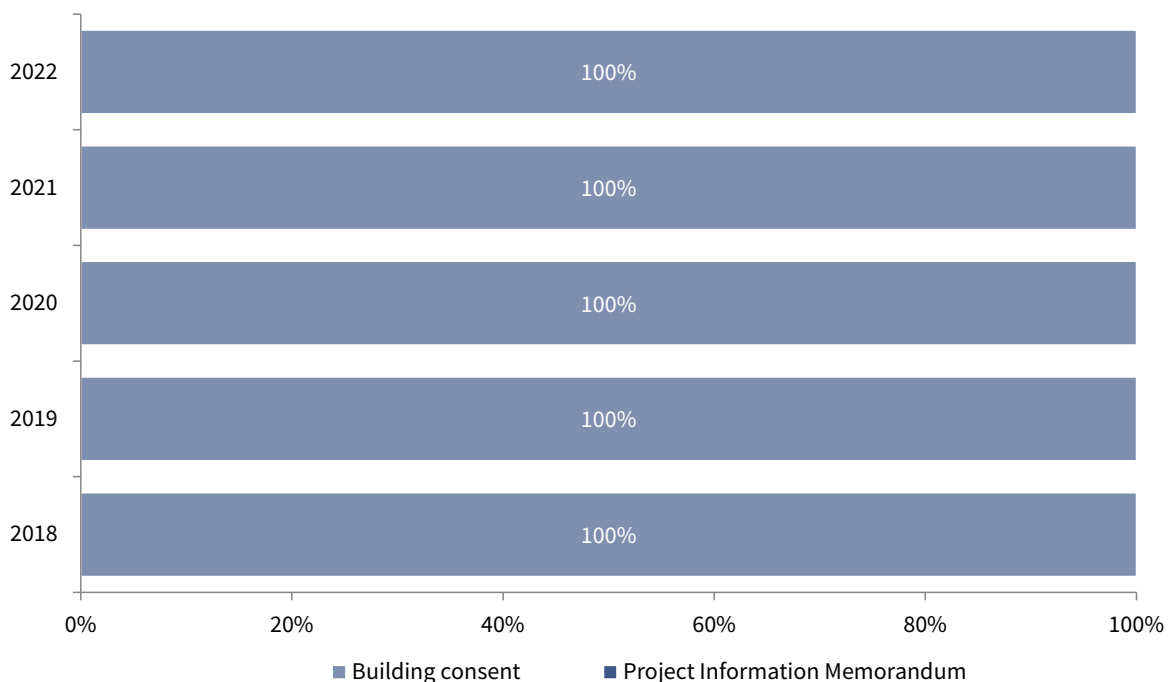

This year 13% of respondents applied for a single building consent, 39% applied for between two and five consents, and 48% applied for more than five consents. All applications were for building consents, rather than project information memorandums.

Number of Consents

Application Type

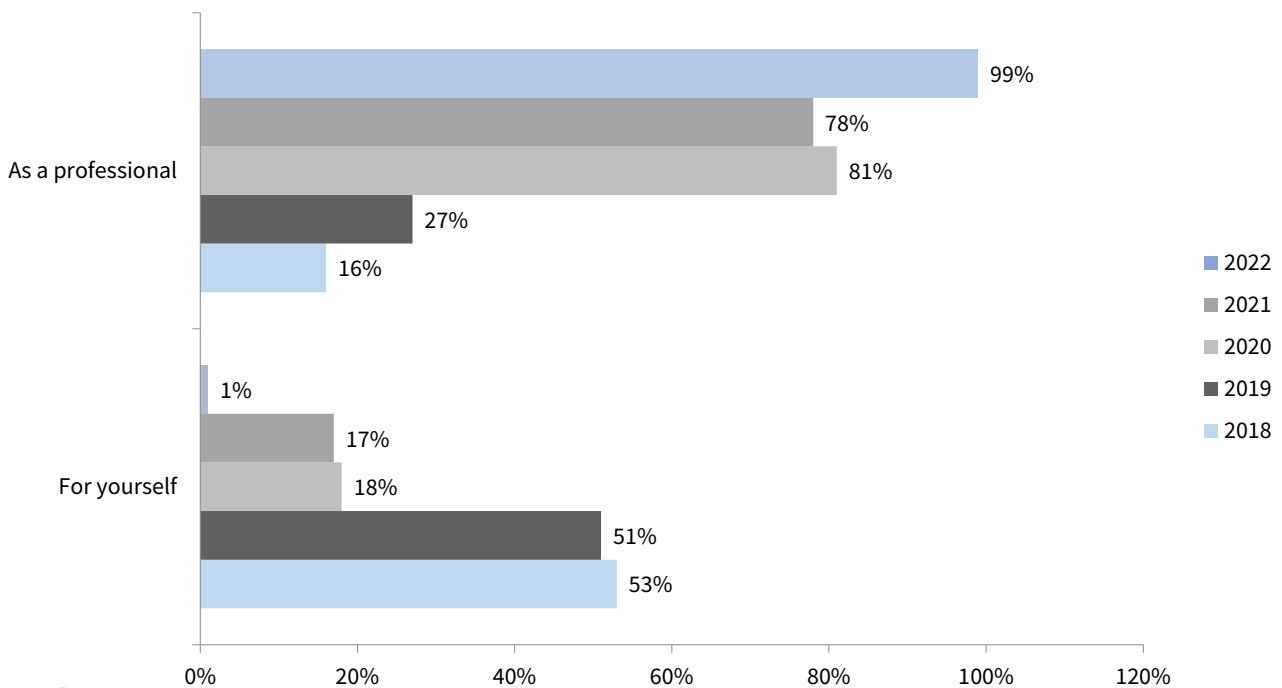

Building Consents

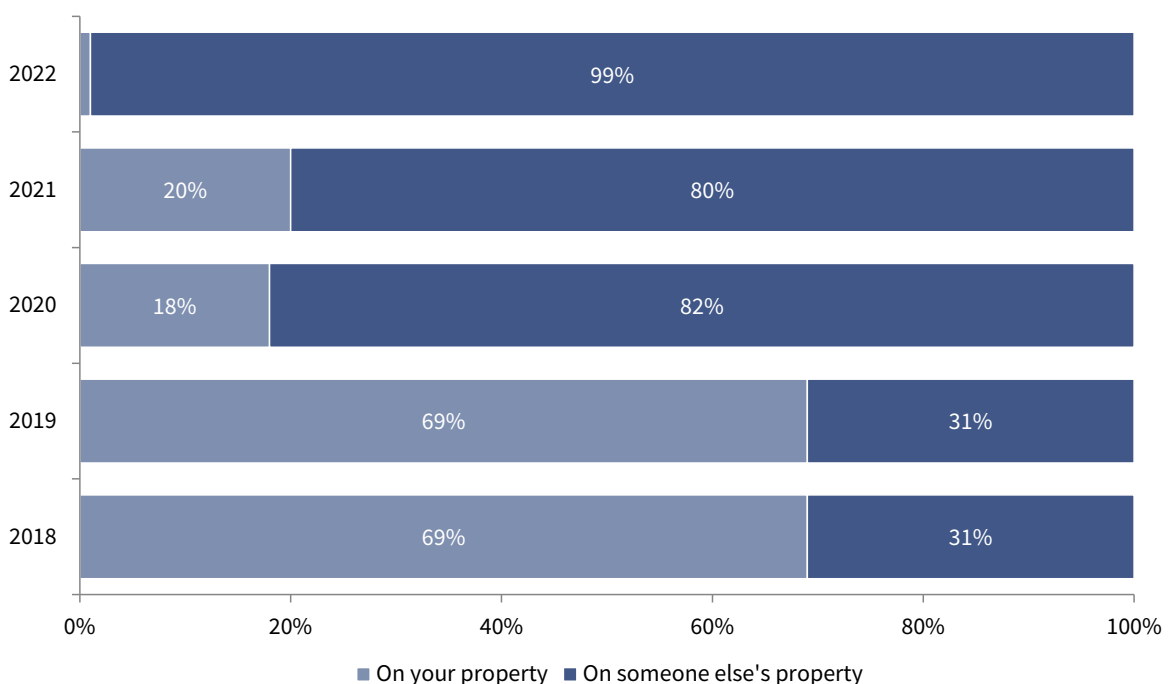

The majority of respondents (99%) who applied for the consents were professionals, while only 1% of the respondents applied for themselves. This is a significant increase from the 2021 sample profile. Similarly, 99% of the applications were for another party's property rather than their own property (1%).

Application

Location of Project

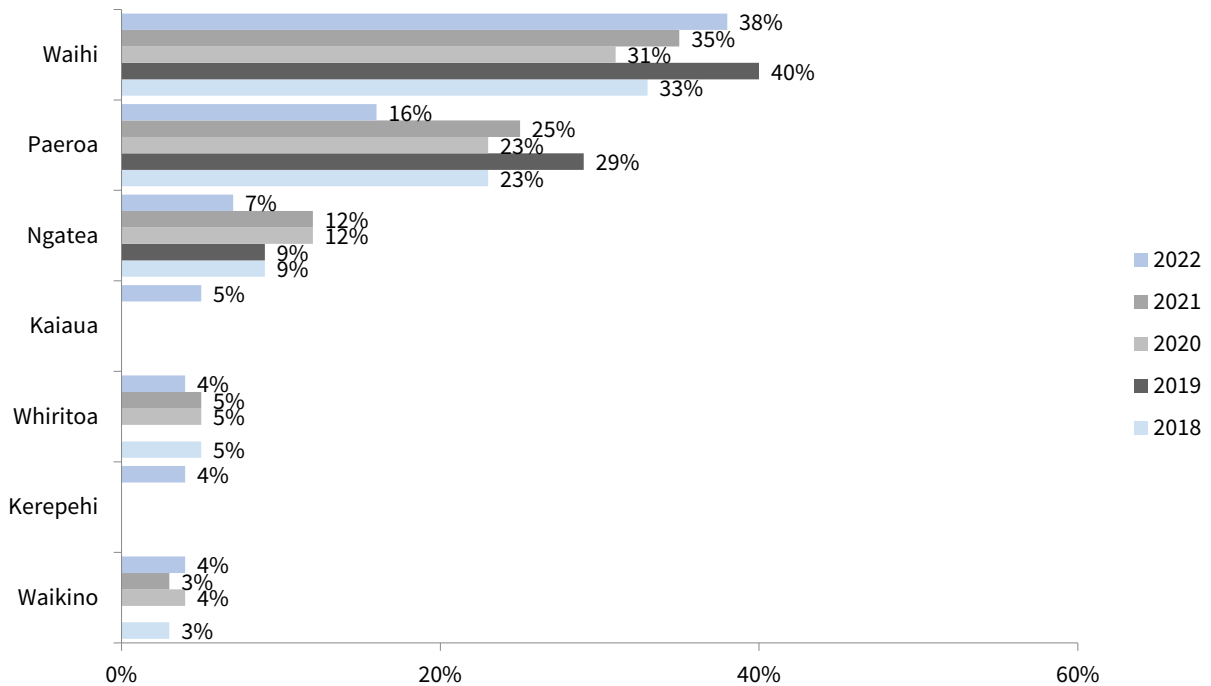

Building Consents

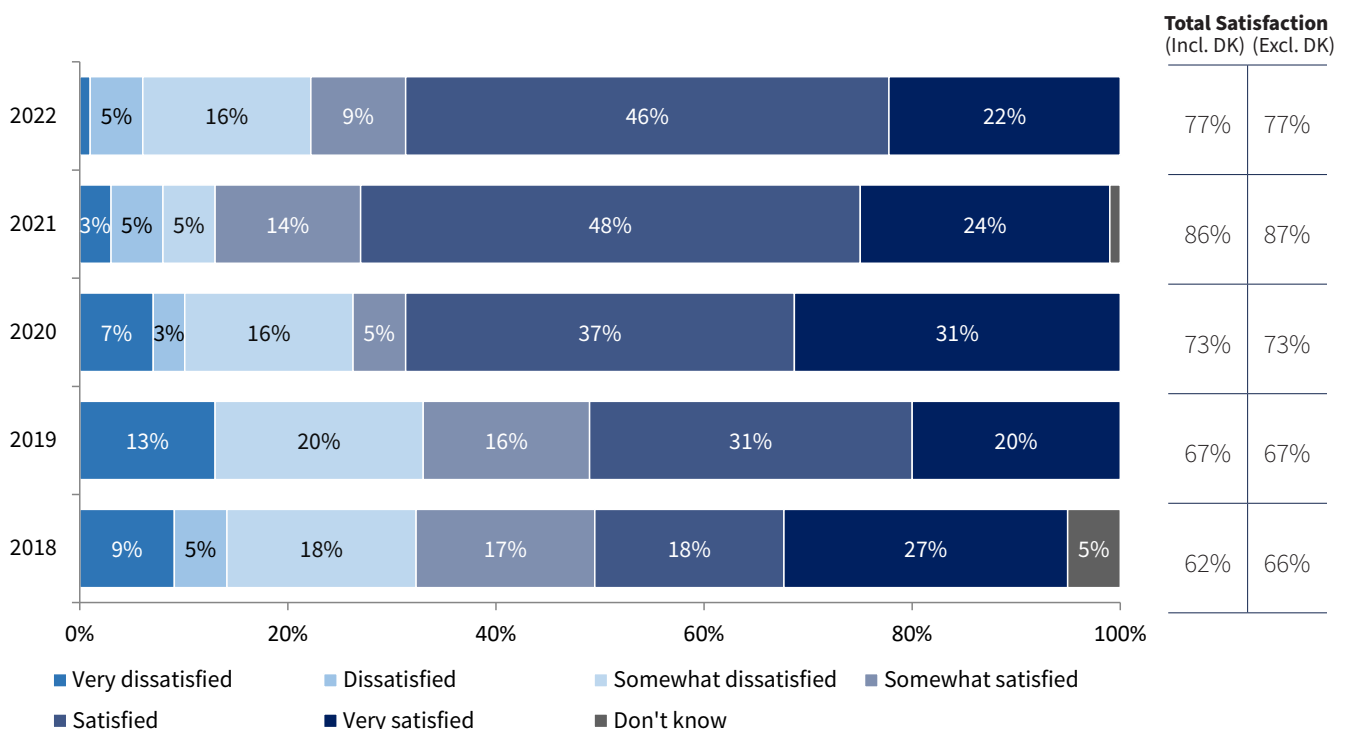

Thirty-eight percent of the applications were for Waihi, 16% were for Paeroa, and 7% were for Ngatea. This year 5% of applications were for Kaiaua. Seventy-seven percent of respondents were satisfied with the service they received for the building consent process, which is a decrease from the 2021 results.

Location of Application

Satisfaction of Service

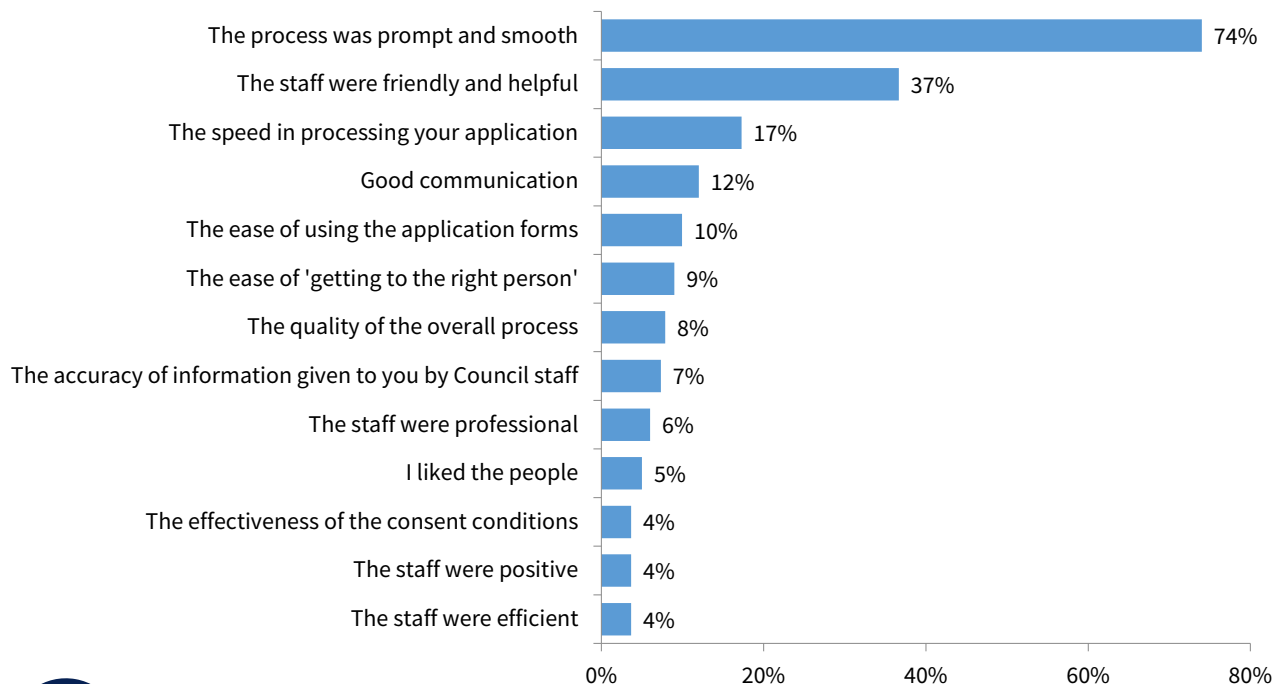

Building Consents

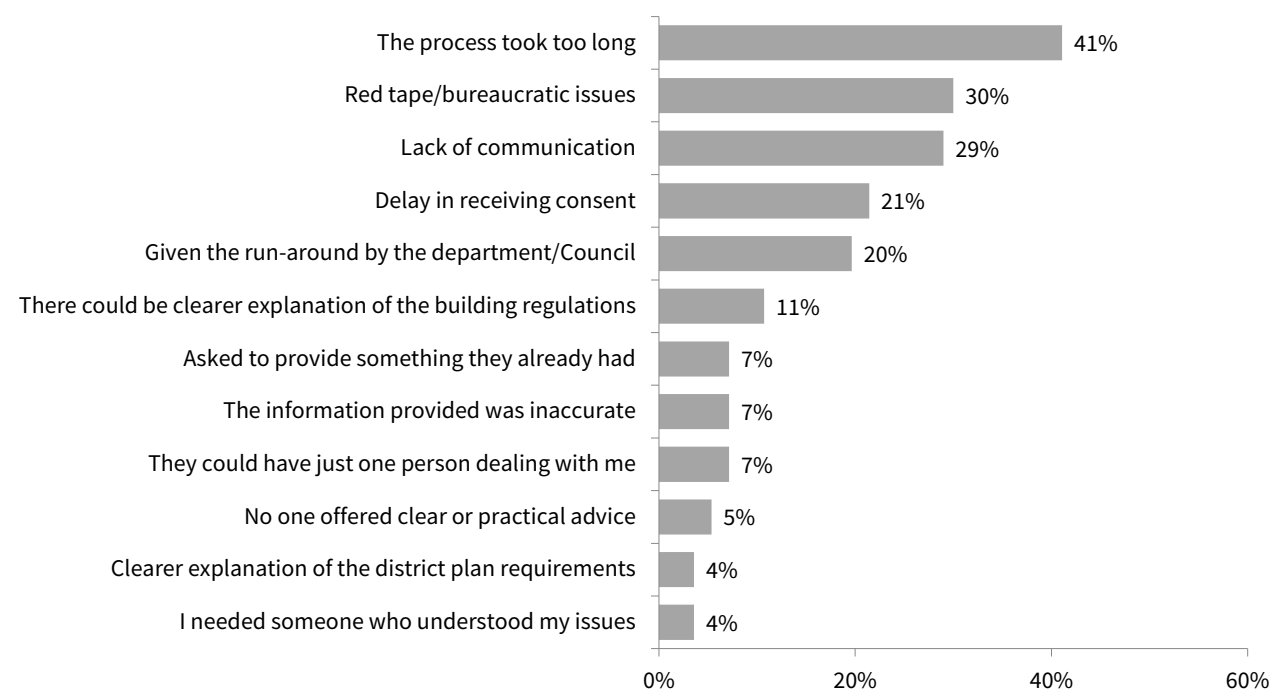

The primary reasons for satisfaction with the consent process were that it was prompt and smooth (74%), the staff were friendly and helpful (37%), the speed of the processing of application (17%), and the good communication (12%). The reasons for dissatisfaction with the process related to how long the process took (41%), red/tape (30%), and the lack of communication (29%).

Reasons for Satisfaction

Reasons for Dissatisfaction

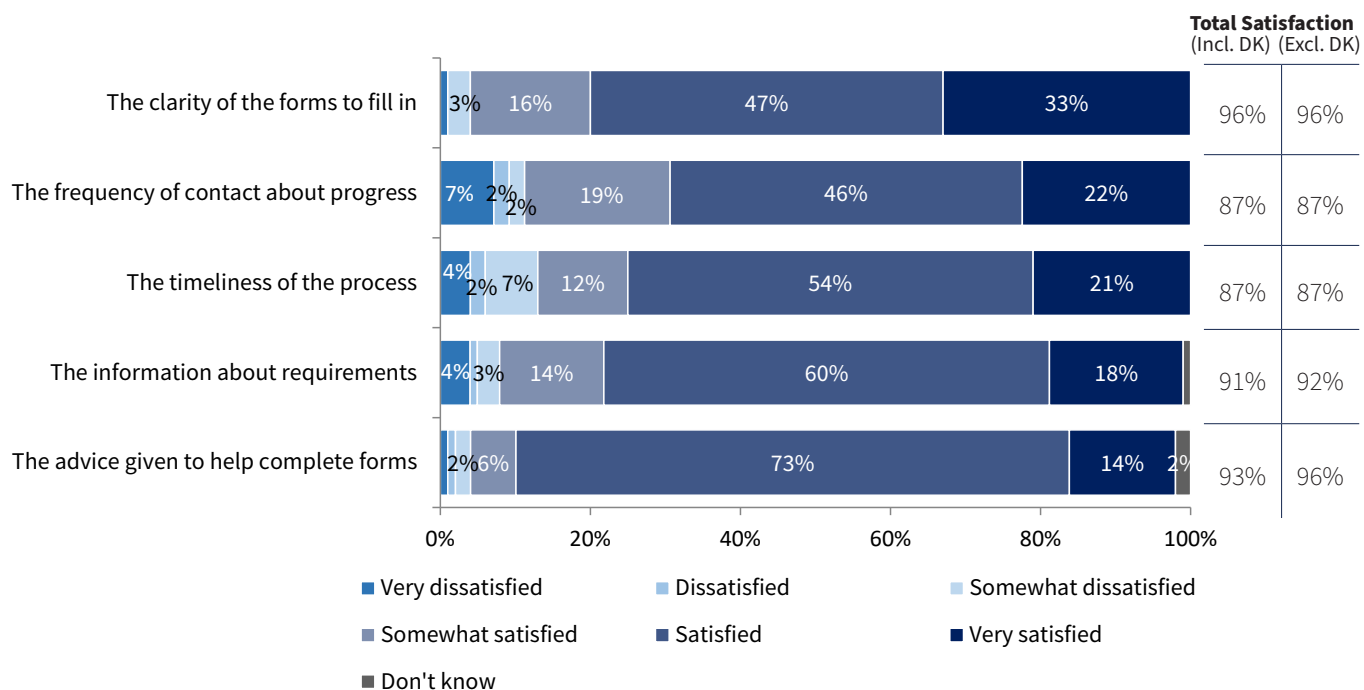

Building Consents

Overall, 96% of respondents were satisfied with the clarity of the forms, 93% were satisfied with the advice given, 93% were satisfied with the information about the requirements. At a slightly lower level 87% (each) of respondents were satisfied with the timeliness of the process and the frequency of contact about the consent progress.

Process and Application

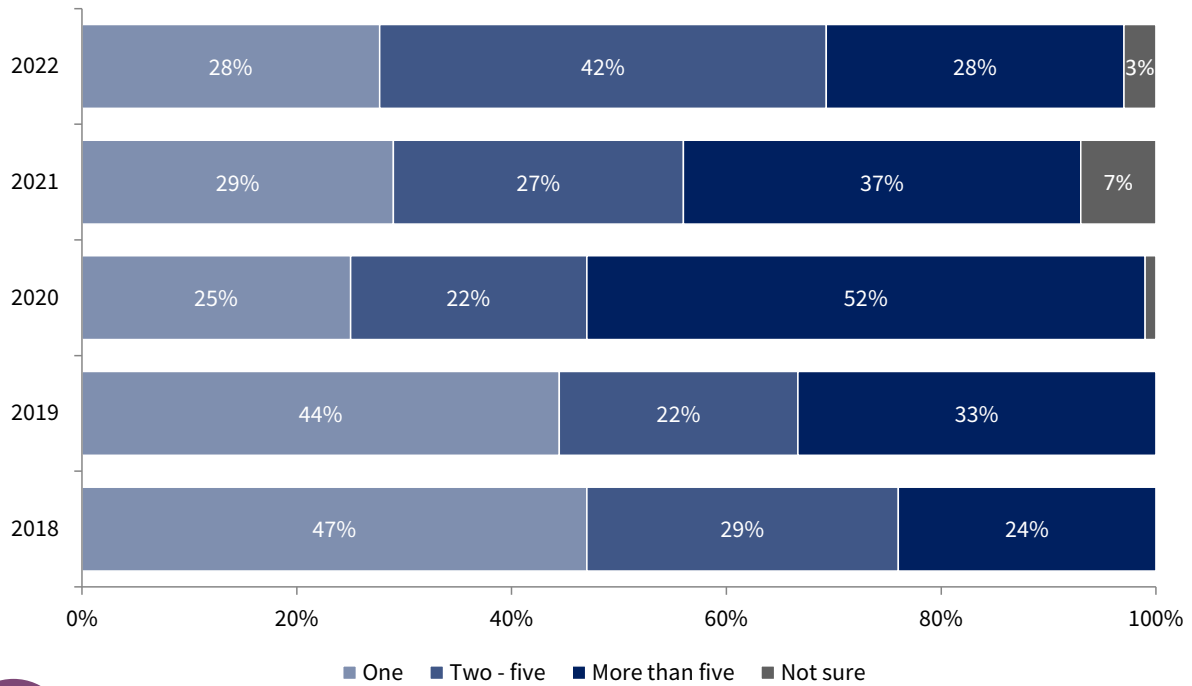

Resource Consents

Resource Consents

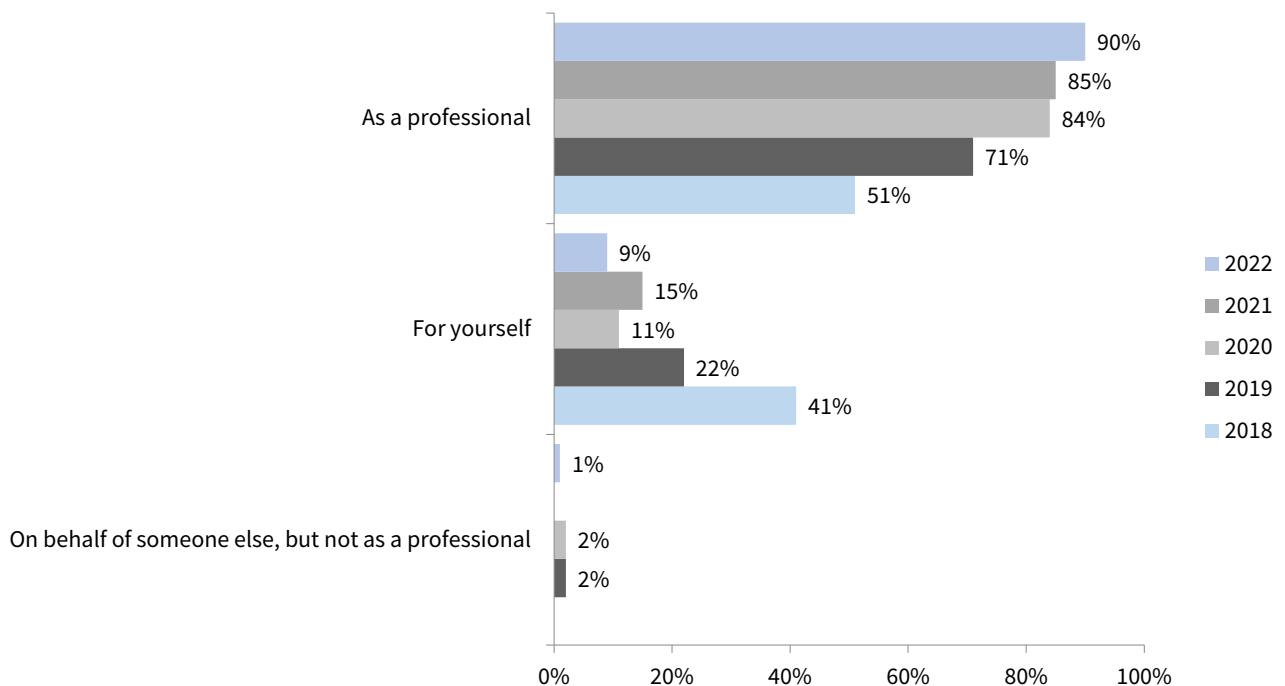

Twenty-eight percent of respondents applied for a single resource consent, 42% applied for between two and five consents, and 28% applied for more than five consents. The majority of applicants were professionals (90%) while only 9% applied for a consent for themselves.

Number of Consents

Application Type

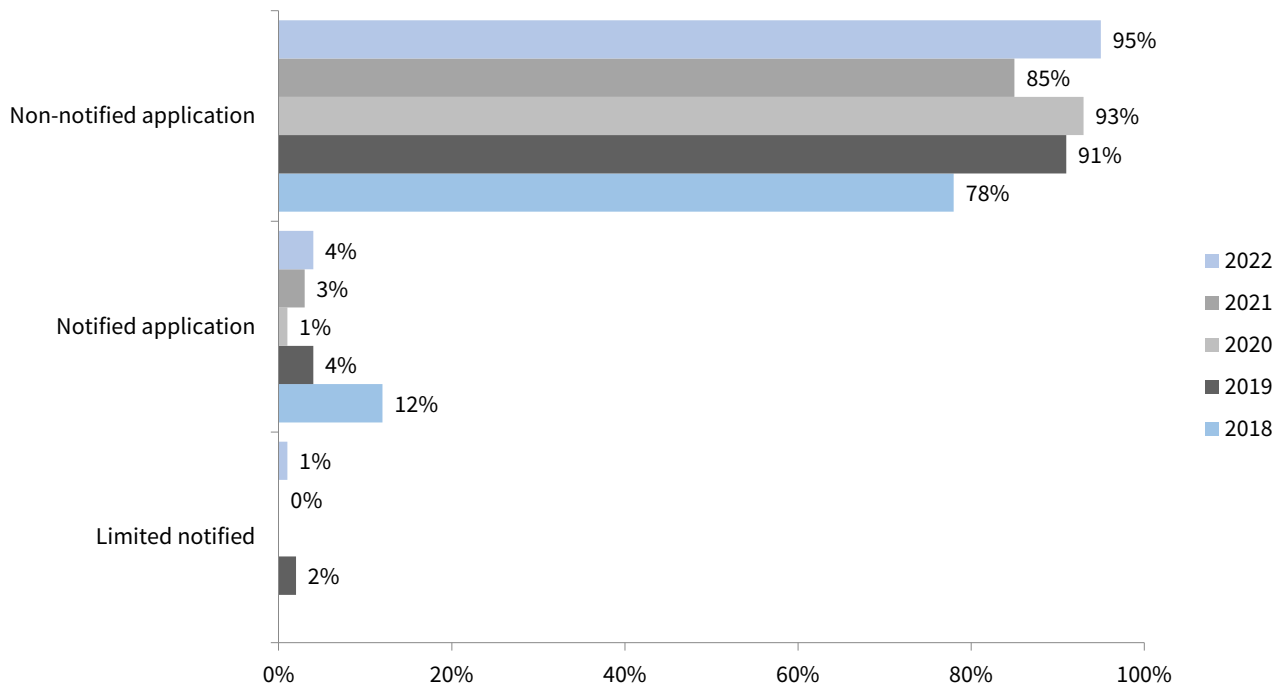

Resource Consents

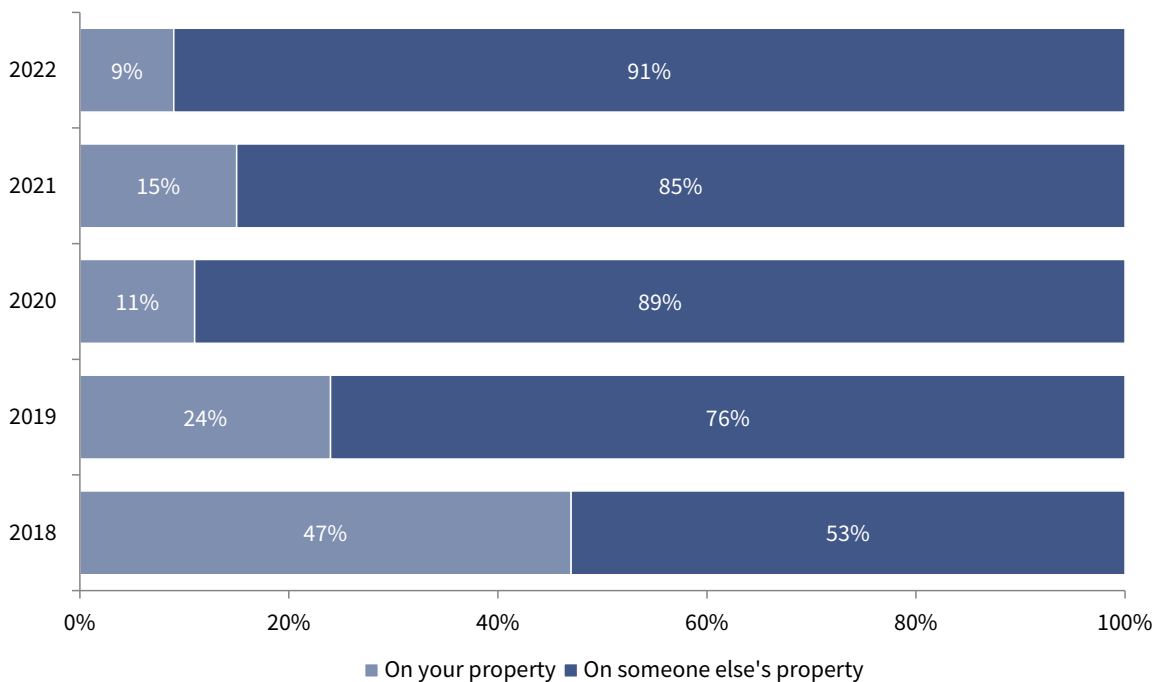

The majority of applications were non-notified applications (95%) and were for a property owned by someone other than the applicant (91%).

Application

Location of Project

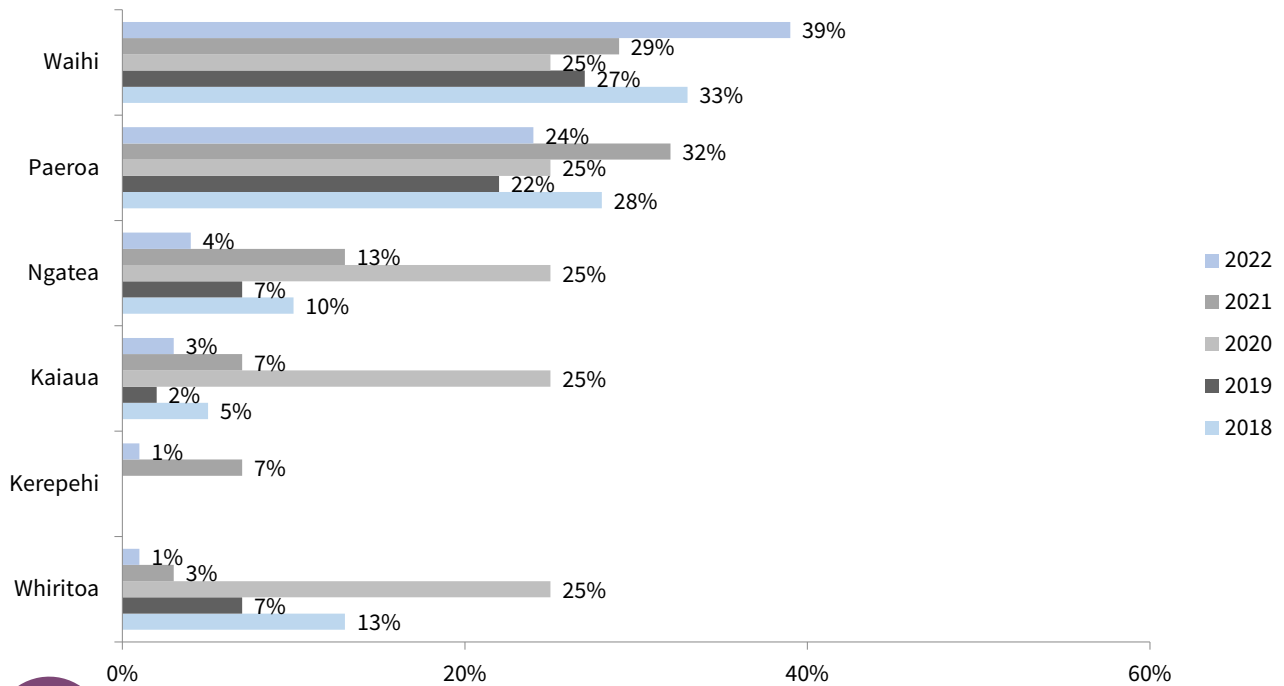

Resource Consents

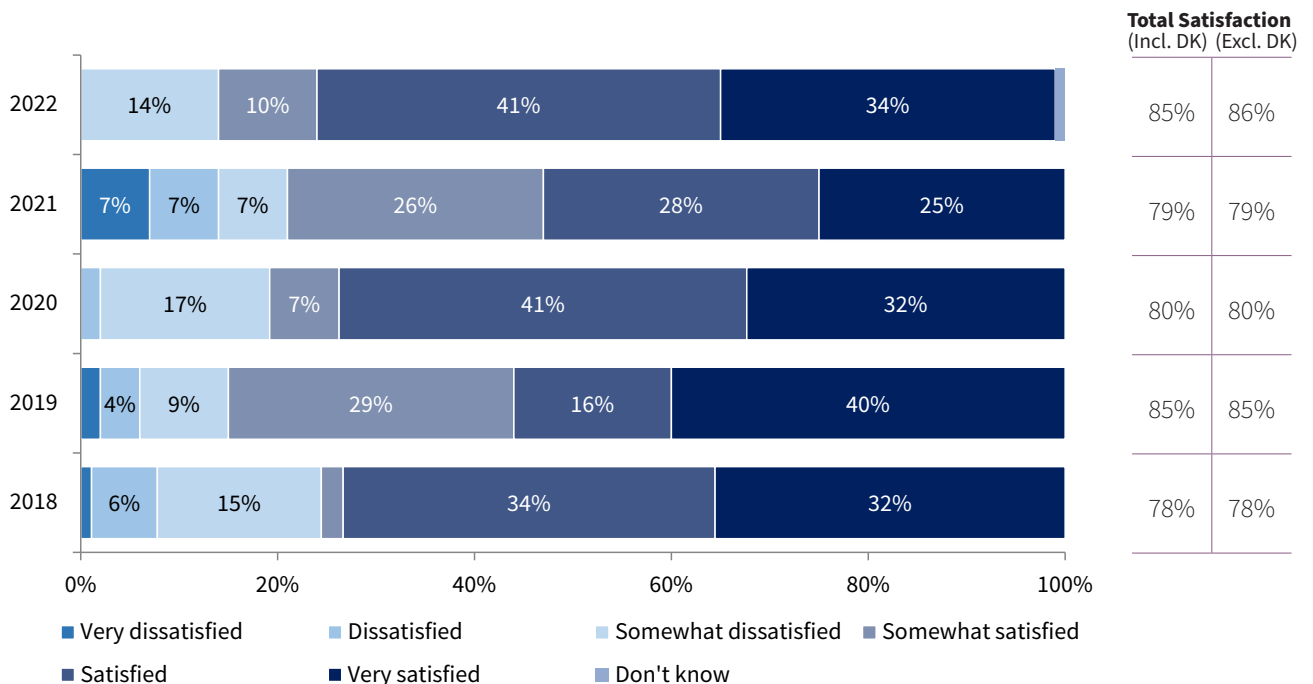

Thirty-nine percent of resource applications were for Waihi and 24% were for Paeroa. At a lower level, 4% of the applications were made for Ngatea and 3% were made for Kaiaua. Eighty-five percent of applicants were satisfied with the service they received for the consent application.

Location of Application

Satisfaction of Service

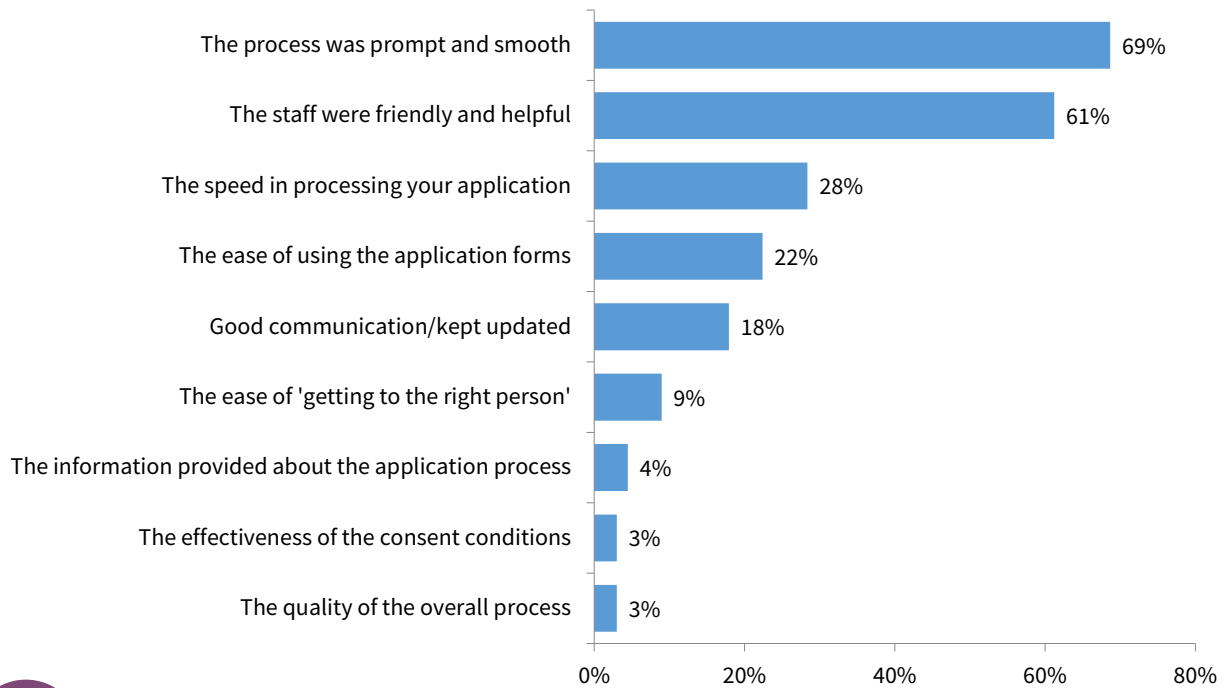

Resource Consents

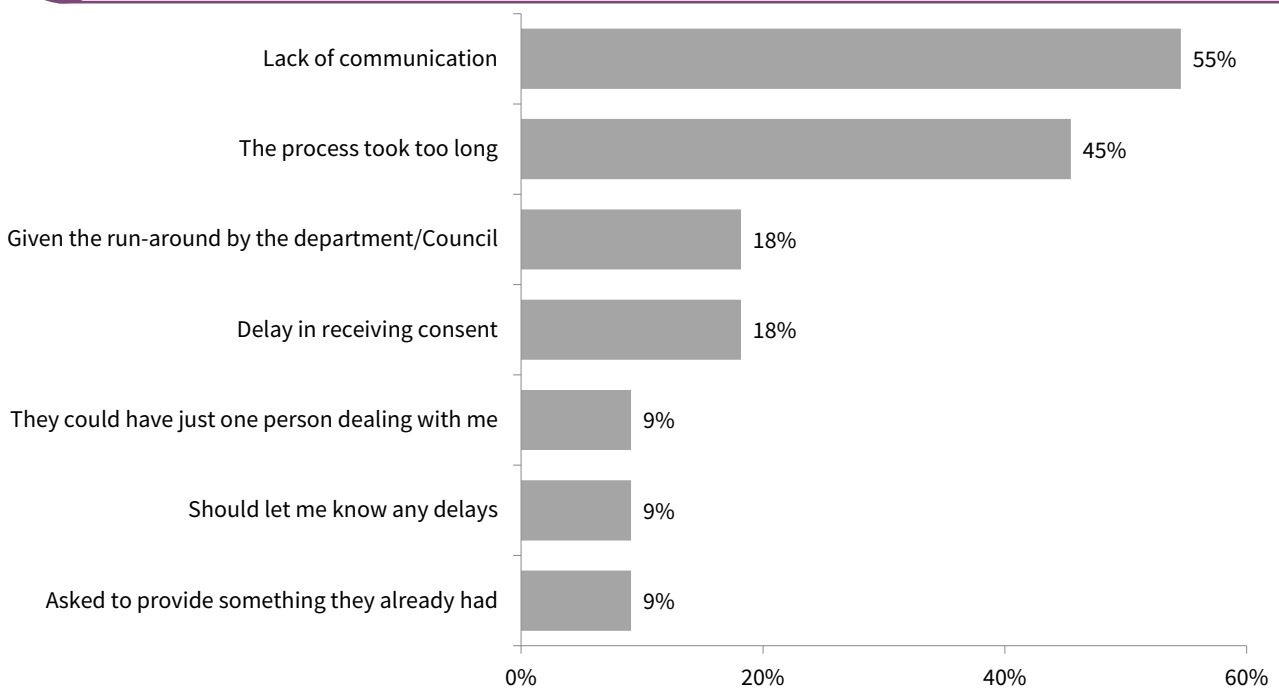

The reasons that applicants were satisfied with the consent process were that the process was prompt and smooth (69%) and the staff were friendly and helpful (61%). The main reasons for dissatisfaction with the process related to a lack of communication (55%), the process taking too long (45%), and being given the run around and delays in receiving the consent (18% each).

Reasons for Satisfaction

Reasons for Dissatisfaction

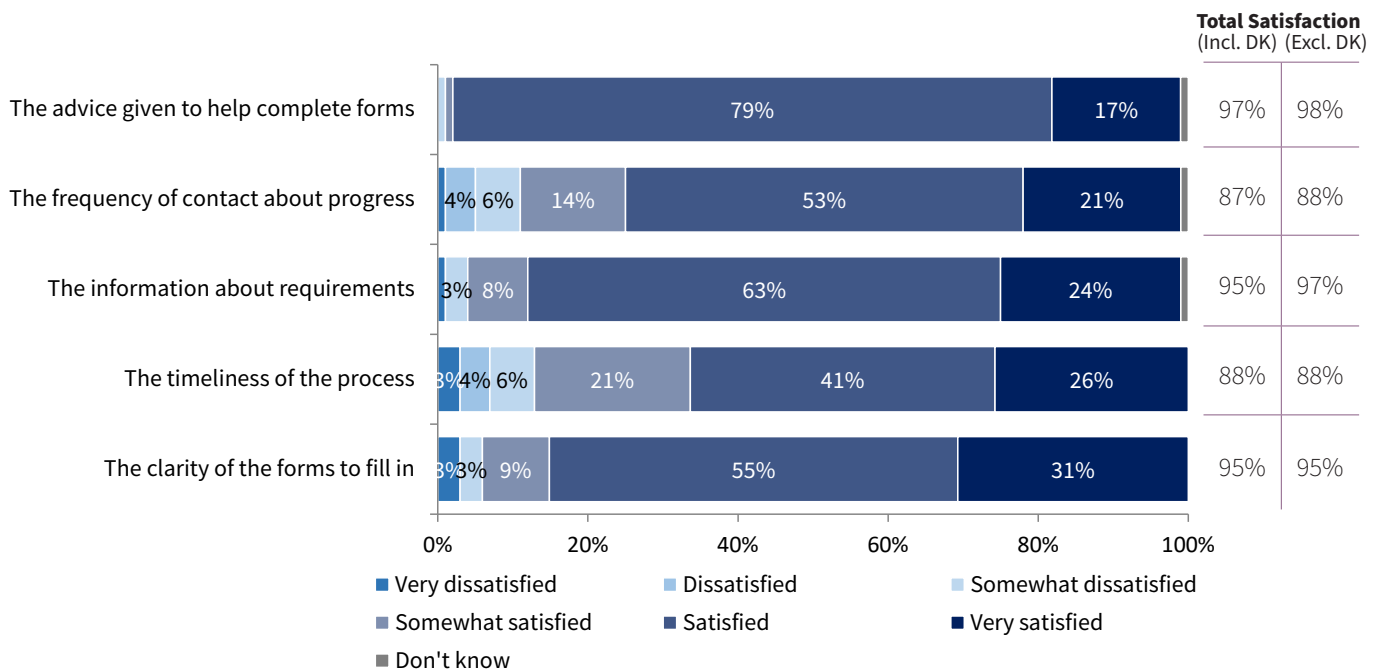

Resource Consents

At a total level 97% of respondents were satisfied with the advice and help they were given and 95% (each) were satisfied with the clarity of the forms and the information requirements. At a slightly lower level, 88% of applicants were satisfied with the timeliness of the process and 87% were satisfied with the frequency of the contact they received.

Process and Application

The background of the slide features a close-up, slightly blurred image of a hand holding a pen, poised to write on a document with a grid pattern. The overall color palette is a gradient of blues, from a light teal at the top to a darker blue at the bottom.
